Crisis Leadership Jan 22 2020 "Nothing tests a leader like a crisis. The highly charged, dramatic events surrounding a crisis profoundly affect the people in an organization and can even threaten the organization's survival. But there are actions a leader can take before, during, and after a crisis to effectively reduce the duration and impact of these extremely difficult situations. At its center, effective crisis leadership is comprised of three things - communication, clarity of vision and values, and caring relationships. Leaders who develop, pay attention to, and practice these qualities go a long way toward handling the human dimension of a crisis. In the end, it's all about the people."

Lessons Unlearned Feb 21 2020 Colonel Pat Proctor's long overdue critique of the Army's preparation and outlook in the all-volunteer era focuses on a national security issue that continues to vex in the twenty-first century: Has the Army lost its ability to win strategically by focusing on fighting conventional battles against peer enemies? Or can it adapt to deal with the greater complexity of counterinsurgent and information-age warfare? In this blunt critique of the senior leadership of the U.S. Army, Proctor contends that after the fall of the Soviet Union, the U.S. Army stubbornly refused to reshape itself in response to the new strategic reality, a decision that saw it struggle through one low-intensity conflict after another—some inconclusive, some tragic—in the 1980s and 1990s, and leaving it largely unprepared when it found itself engaged—seemingly forever—in wars in Afghanistan and Iraq. The first book-length study to connect the failures of these wars to America's disastrous performance in the war on terror, Proctor's work serves as an attempt to convince Army leaders to avoid repeating the same mistakes.

***Afghan Lessons* May 26 2020 Fernando Gentilini served nearly two years as the civilian representative of NATO in Afghanistan, running a counterinsurgency campaign in the wartorn nation. *Afghan Lessons* is the fascinating story of his mission, a firsthand view of Afghanistan through a kaleidoscope. He explores Afghan history, literature, tradition, and culture to understand some of the most basic questions of Western involvement: What is the purpose? What does an international presence mean, and how can it help?**

Highlights from *Afghan Lessons* "This is a book about different

worlds, different realities. The reality of everyday life in an unreal world. People that need to be looked after, jobs that need to be done, a country that needs to be restored, all from within the necessary confines of an armed camp. And this in the middle of another reality, which we do not understand, full of things forgotten under decades of war. The keys to this reality lie in the past, perhaps lost.” —from the Foreword by Robert Cooper “To tempt me to explore their country, the Afghans kept repeating that there were three different Afghanistans: ‘The first is the one you Westerners imagine; another coincides with the city of Kabul; the third is the country of remote provinces, far away from the cities, and of the three, this is the only real Afghanistan.’” “‘There can be no development without security and no security without development.’ . . . Everyone said it over and over again, both the civilians and the military, but depending on whether it was said by the former or the latter, the emphasis was placed on the first or second part of the slogan. In all honesty this seemingly obvious concept concealed two contrasting ways of seeing things.”

Harsh Lessons Jul 28 2020 The recent Afghanistan and Iraq wars were very controversial. The conflicts' casualties, intractability and the apparent failure of the US and its allies to achieve their objectives mean that many see the wars as failures. This resulted in a loss of confidence in the West of the utility of force as an instrument of state power. Both wars have been well described by journalists. There is no shortage of memoirs. But there is little discussion of how the conduct of these wars and capabilities of the forces involved changed and evolved, and of the implications of these developments for future warfare. This book gives readers a clear understanding of the military character dynamics of both wars and how these changed between 2001 and 2014. This includes the strategy, operations, tactics and technology of the forces of the US and its allies, Afghan and Iraqi government forces as well as insurgents and militias, showing how they evolved over time. Many of these developments have wider relevance to future conflicts. The

book identifies those that are of potential wider application to US, NATO and other western forces, to insurgents, as well as to forces of states that might choose to confront the west militarily.

The Limits of U.S. Military Capability Jun 26 2020 Military Capability carefully assesses evidence to develop lessons applicable to other conflicts—especially the ongoing war in Afghanistan.

Establishing a Lessons Learned Program Jun 07 2021 For many years, the U.S. Army recognized the need to share information or lessons gained from training and actual combat operations. During World War II and the Korean War, the Army published "combat bulletins" in an attempt to share combat experiences with other Soldiers. During the Vietnam War, Army units published quarterly operational reports that made an effort to share lessons from combat operations. By doing this, units learned from the mistakes others made and were given an opportunity to avoid the same problems. Although these procedures were successful, the Army did not have a formal or permanent program in place to collect, analyze, and share lessons in both peacetime and wartime. As a result, the Army established the Center for Army Lessons Learned (CALL) in 1985. The Army had officially recognized the need to share lessons gained from training experiences and actual combat operations. Since the inception of CALL, the Army, as a learning organization, greatly evolved over time. CALL also evolved. Now, military communities, civilian governmental agencies, and the corporate world recognize the importance of sharing knowledge and learning from past experiences. In many ways, the U.S Army led this effort by allowing commanders to make honest mistakes in training, talk about those mistakes openly, and share what was done to correct those mistakes with other units about to undergo the same training experience. This is an essential precondition for having an effective lessons learned (LL) program: the ability to self-analyze and self-criticize in an atmosphere where there is no blame. The results were instrumental in changing the Army and creating a learning environment that won the Cold War, ensured victory in Desert Storm, and continues to support our Soldiers in Iraq and Afghanistan today.

Part One, "Understanding Charleston," contains a discussion of leadership, a campaign overview, and a brief introduction to the key participants. Part Two, "Leadership Vignettes," includes 21 scenarios that span the actions of the most senior leaders down to those of individual soldiers. Each scenario provides the context, explains the action in the terms of leadership lessons learned, and concludes with a list of

"take-aways" to crystallize the lessons for the reader. The book ends with summary information and a set of conclusions about leadership during the Charleston Campaign. Although it featured some of the era's most advanced military technology, the Charleston Campaign was decided by more than just shot and shell, and this book offers a perspective of the campaign as a leadership laboratory.

Discipline Jan 02 2021 A profound and thorough examination of the level of discipline at the United States Naval Academy, our nation's 4th best military academy. Learn the techniques most popular among midshipmen for sleeping during important events and ways to make any march-on look sloppy and unprofessional. Important Note for Annapolis Grads: In accordance with a complaint filed by Naval Academy lawyers, this book does not actually include any lessons about the rigorous methods taught at USNA. It is a blank book that says 'Beat Navy' at the bottom of every page. High Praise for Discipline: The Annapolis Way: "The most powerful study of sloppy formations I've ever read. You'll really understand USNA after reading this book." - John McCain USNA '58 "The books holds

lessons for anyone who aspires to the same below average level of military bearing that midshipmen exhibit." - Jimmy Carter USNA '46
It Worked for Me Mar 24 2020 New York Times Bestselling Author Colin Powell, one of America's most admired public figures, reveals the unique lessons that shaped his life and career It Worked for Me is a collection of lessons and personal anecdotes that shaped four star-general and former Secretary of State Colin Powell's legendary career in public service. At its heart are Powell's "Thirteen Rules,"—notes he accumulated on his desk that served as the basis for the leadership presentations he delivered throughout the world. Powell's short-but-sweet rules such as "Get mad, then get over it" and "Share credit," are illuminated by revealing personal stories that introduce and expand on his principles for effective leadership: conviction, hard work, and above all, respect for others. In work and life, Powell writes, "It is the human gesture that counts." A compelling storyteller, Powell shares parables both humorous and solemn that offer wise advice on succeeding in the workplace and beyond. "Trust your people," he counsels as he delegates presidential briefing responsibilities to two junior aides. "Do your best--someone is watching," he advises those just starting out, recalling his own teenage summer job shipping cases of soda. Powell combines the insight he gained serving in the top ranks of the military and in four presidential administrations, as well as the lessons learned from his hardscrabble upbringing in the Bronx and

his training in the ROTC. The result is a powerful portrait of a leader who was reflective, self-effacing, and grateful for the contributions of every employee, no matter how junior. Powell's writing--straightforward, accessible, and often very funny--will inspire, move, and surprise readers. Thoughtful and revealing, his book is a brilliant and original blueprint for leadership.

The Lessons of Tragedy Aug 29 2020 An eloquent call to draw on the lessons of the past to address current threats to international order The ancient Greeks hard-wired a tragic sensibility into their culture. By looking disaster squarely in the face, by understanding just how badly things could spiral out of control, they sought to create a communal sense of responsibility and courage—to spur citizens and their leaders to take the difficult actions necessary to avert such a fate. Today, after more than seventy years of great-power peace and a quarter-century of unrivaled global leadership, Americans have lost their sense of tragedy. They have forgotten that the descent into violence and war has been all too common throughout human history. This amnesia has become most pronounced just as Americans and the global order they created are coming under graver threat than at any time in decades. In a forceful argument that brims with historical sensibility and policy insights, two distinguished historians argue that a tragic sensibility is necessary if America and its allies are to address the dangers that menace the international order today. Tragedy may be commonplace, Brands and Edel argue, but it is not inevitable—so long as we regain an appreciation of the world's tragic nature before it is too late.

Military Lessons Of The Falkland Islands War Dec 13 2021 Contains analyses of the war by several prominent U.S. experts on national security affairs. Their observations reflect the continuing debate on such key issues in U.S. defence planning - and in Soviet defence planning as well - as the controversy over large versus small carriers, the advantages and disadvantages of a diesel-versus nuclear-powered submarine fleet, the effectiveness of the Harrier-type aircraft, the influence of high technology on amphibious warfare, and the ever increasing use of 'smart' weapons by all-purpose conventional armed forces.

Breaching the Summit Nov 24 2022 This unique anthology collects personal stories and leadership lessons from six highly-ranked officers across all branches of service. In Breaching the Summit, six senior enlisted advisors to the joint chiefs of staff share their

stories, experiences, and lessons learned from a lifetime of military service. In their own words, each tells how they got their start, how mentors encouraged them along the way, and how they eventually became the highest-ranking enlisted member in their respective services. Their personal stories illustrate battle-tested principles of successful leadership that are applicable in all walks of life. The authors include Ken Preston, 13th Sergeant Major of the Army (retired); Mike Barrett, 17th Sergeant Major of the Marine Corps (retired); Rick West, 12th Master Chief Petty Officer of the Navy (retired); James Roy, 16th Chief Master Sergeant of the Air Force (retired); Denise Jelinski-Hall, Senior Enlisted Advisor to the National Guard Bureau (retired); and Skip Bowen, 10th Master Chief Petty Officer of the Coast Guard (retired). “Books on leadership are many, but none are as practical, clear, and proven as *Breaching the Summit*.” —Adm. Gary Roughead, US Navy (retired)

Combat Social Work Sep 10 2021 Social workers have a long, proud history of service in most branches of the United States military. The experiences of social workers and other human service professionals of all military ranks have an important, often profound, and lasting impact that informs not only their practice within the military but throughout their career long after they have left the combat zone. In exploring the experiences of 13 American combat social workers (CSWs)--whose role is, among other things, providing military mental health services to members in their unit--this book shares lessons from military service through the lens of social work practitioners. The text includes strategies learned about social work practice in a war zone that are highly applicable to other highly stressful contexts (e.g., crisis intervention, stress reduction procedures, suicide prevention, brief psychotherapy, and consultation on family issues). *Combat Social Work* is uniquely positioned to serve as a valuable resource for social workers and other mental health providers interested in the assessment and treatment of trauma with active members of the military and military veterans.

Securing the MRAP Apr 24 2020 Dwight D. Eisenhower once quipped, “You will not find it difficult to prove that battles, campaigns, and even wars have been won or lost primarily because of logistics.” Military acquisition and procurement—that is, how a nation manages investments, technologies, programs, and support—is critical to wartime success or failure. When unexpected battlefield problems arise, how do the government, the military, and industry work together to ensure effective solutions? During the

American counterinsurgent campaign in Iraq, the improvised explosive device emerged as a disruptive and devastating threat. As Humvees, and their occupants, were ripped apart by IEDs, it was clear that new solutions had to be found. These solutions already existed but had not been procured, highlighting the need for more effective marketing to the military by industry. The ultimate successful response—the mine-resistant, ambush-protected vehicle, or MRAP—required years of entrepreneurial marketing by the defense industry. In *Securing the MRAP: Lessons Learned in Marketing and Military Procurement*, James Hasik explores how these vehicles, which the American military mostly rejected despite the great need for them, eventually came to be adopted as the Pentagon's top procurement priority. Hasik traces the story of the MRAP from the early 1970s to the future of mine-resistant vehicles on the battlefields of tomorrow. An important contribution to the seemingly disparate fields of marketing and defense policy, *Securing the MRAP* is an eye-opening revelation to defense industrialists, military officers, and government officials who want to understand how to avoid another IED-Humvee debacle.

Lessons Encountered Oct 31 2020 This volume represents an early attempt at assessing the Long War, now in its 14th year. Forged in the fires of the 9/11 attacks, the war includes campaigns against al Qaeda, major conflicts in Iraq and Afghanistan, and operations in the Horn of Africa, the Republic of the Philippines, and globally, in the air and on the sea. The authors herein treat only the campaigns in Afghanistan and Iraq, the largest U.S. efforts. It is intended for future senior officers, their advisors, and other national security decisionmakers. By derivation, it is also a book for students in joint professional military education courses, which will qualify them to work in the field of strategy. While the book tends to focus on strategic decisions and developments of land wars among the people, it acknowledges that the status of the United States as a great power and the strength of its ground forces depend in large measure on the dominance of the U.S. Navy and U.S. Air Force in their respective domains.

Hurricane Katrina Oct 19 2019 The efforts undertaken by civilian and military organizations in response to Hurricane Katrina were

historically unprecedented, but a number of changes would enhance future Army and National Guard disaster-response efforts, including preparing governors to call up Guard units for out-of-state emergencies and the creation of regional standing homeland security task forces.

Drawing upon extensive original research, this book explores best practice in army lessons-learned processes. Without the correct learning mechanisms, military adaptation can be blocked, or the wider lessons from adaptation can easily be lost, leading to the need to relearn lessons in the field, often at great human and financial cost. This book analyses the organisational processes and activities which can help improve tactical- and operational-level learning through case studies of lessons learned in two key NATO armies: that of Britain and of Germany. Providing the first comparative analysis of the variables which facilitate or impede the emergence of best practice in military learning, it makes an important contribution to the growing scholarship on knowledge management and learning in public organisations. It will be of much interest to

lessons-learned practitioners, and students of military and strategic studies, defence studies, organisation studies and security studies.

Military Leadership Lessons for Public Service Apr 05 2021 Military veterans have had some of the most intensive leadership training available. Many return to their communities seeking to apply what

they have learned. Those who enter the world of public affairs--where colleagues are increasingly less likely to have served in the military--may encounter a popular misconception: that military leadership is all about exercising authority and giving orders. In fact military leadership is based on interpersonal dynamics, often learned through trying circumstances. Effective management of civil emergencies--as shown by 9/11 and Hurricane Katrina--calls for the same official demeanor, decisiveness and trustworthiness as does combat. Good leadership is fundamentally the same in ordinary day-to-day challenges as well. This book describes how the principles and methods of military leadership are effective for public service. Instructors considering this book for use in a course may request an examination copy here.

Efficient Or Effective? May 06 2021 The Army recently revised the Army Lessons Learned regulation to centralize the collection, analysis and dissemination of lessons learned. Historically, the Army has not sustained an effective lessons learned process. TRADOC has the lead for the Army in managing this process. TRADOC has attempted to create a more efficient process that may reduce effectiveness during combat operations in OEF and OIF. Today, the Army is facing a significant challenge to quickly capture lessons learned, analyze and redistribute them throughout the Army. Due to the complex environment in OEF/OIF and an adaptive enemy, doctrine and lessons learned are being derived at the unit level, redistributed and changed before TRADOC can adequately address and distribute them through doctrinal publications and military schools. The US Army Engineer School's Counter Explosive Hazard Center is currently integrated into the lesson learned process with regard to improvised explosive devices. The process is modified from the proposed lessons learned process. The Army lessons learned process and the Counter Explosive Hazard Center processes will be analyzed for efficiencies and effectiveness with recommendations provided to improve the current process.
