Introduction to Information Retrieval Feb 26 2021 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are

also available through the book's supporting website to help course instructors prepare their lectures.

Allergic Oct 13 2019 A semiautobiographical coming-of-age middle-grade graphic novel featuring a girl with severe allergies who just wants to find the perfect pet At home, Maggie is the odd one out. Her parents are preoccupied with the new baby they're expecting, and her younger brothers are twins and always in their own world. Maggie thinks a new puppy is the answer, but when she goes to select one on her birthday, she breaks out in hives and rashes. She's severely allergic to anything with fur Can Maggie outsmart her allergies and find the perfect pet? With illustrations by Michelle Mee Nutter, Megan Wagner Lloyd draws on her own childhood to tell a heartfelt story of family, friendship, and finding a place to belong.

Behavioral Neuroscience Jan 08 2022 Revision of Ninth edition published by Sinauer Associates, 2020.

Real-Time Rendering May 20 2020 Thoroughly revised, this third edition focuses on modern techniques used to generate synthetic three-dimensional images in a fraction of a second. With the advent of programmable shaders, a wide variety of new algorithms have arisen and evolved over the past few years. This edition discusses current, practical rendering methods used in games and other applications. It also presents a solid theoretical framework and relevant mathematics for the field of interactive computer graphics, all in an approachable style. The authors have made the figures used in the book available for download for fair use.:Download Figures. Reviews Rendering has been a required reference for professional graphics practitioners for nearly a decade. This latest edition is as relevant as ever, covering topics from essential mathematical foundations to advanced techniques used by today ' s cutting edge games. -- Gabe Newell, President, Valve, May 2008 Rendering ... has been completely revised and revamped for its updated third edition, which focuses on modern techniques used to generate three-dimensional images in a fraction of the time old processes took. From practical rendering for games to math and details for better interactive applications, it's not to be missed. -- The Bookwatch, November 2008 You'll get brilliantly lucid explanations of concepts like vertex morphing and variance shadow mapping—as well as a

new respect for the incredible craftsmanship that goes into today's PC games.
-- Logan Decker, PC Gamer Magazine , February 2009

As Nature Made Him Jan 16 2020 NEW YORK TIMES BESTSELLER
“ We should aspire to Colapinto's stellar journalist example: listening carefully to the circumstances of those who are different rather than demanding that they conform to our own. ” —Washington Post The true story about the "twins case" and a riveting exploration of medical arrogance, misguided science, societal confusion, gender differences, and one man's ultimate triumph In 1967, after a twin baby boy suffered a botched circumcision, his family agreed to a radical treatment that would alter his gender. The case would become one of the most famous in modern medicine—and a total failure. The boy's uninjured brother, raised as a boy, provided to the experiment the perfect matched control. As Nature Made Him tells the extraordinary story of David Reimer, who, when finally informed of his medical history, made the decision to live as a male. Writing with uncommon intelligence, insight, and compassion, John Colapinto sets the historical and medical context for the case, exposing the thirty-year-long scientific feud between Dr. John Money and his fellow sex researcher, Dr. Milton Diamond—a rivalry over the nature/nurture debate whose very bitterness finally brought the truth to light. A macabre tale of medical arrogance, it is first and foremost a human drama of one man's—and one family's—amazing survival in the face of terrible odds.

World Report 2020 Oct 25 2020 The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Biopsychology Nov 18 2022 Written in a friendly and engaging manner, Pinel's Biopsychology introduces the fundamentals of modern biopsychology. The fourth edition has been thoroughly updated to keep abreast of the many recent developments in this rapidly changing field. *430 new references keep

this text at the cutting edge of its field. *New or expanded coverage of dozens of topics, including: cognitive neuroscience, evolution, the human genome project, human brain scanning, genetic engineering, search for a Parkinson's gene, melatonin and sleep, functional brain imaging, and language. *More coverage of cognitive neuroscience: parallel processing, conscious awareness, and functional brain imaging. *New emphasis on the diathesis-stress model of psychological dysfunction (Ch. 17). *A new section on the pitfalls in thinking about human evolution (Ch. 2). *430 new references keep this text at the cutting edge of its field. *New or expanded coverage of dozens of topics, including: cognitive neuroscience, evolution, the human genome project, human brain scanning, genetic engineering, search for a Parkinson's gene, melatonin and sleep, functional brain imaging, and language. *More coverage of cognitive neuroscien

Study Guide for Biopsychology Dec 15 2019

An Historical Introduction to Modern Psychology Sep 16 2022 First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

How Children Develop May 12 2022 How Children Develop has established itself as the topically organized textbook teachers and researchers trust for the most up-to-date perspectives on child development. The authors, each a well-known scientist and educator--have earned that trust by introducing core concepts and impactful discoveries with an unparalleled integration of theory, cultural research, and applications, all in a style that is authoritative yet immediately understandable and relevant to students. The new edition has been rigorously updated and welcomes co-author Elizabeth Gershoff (The University of Texas at Austin), who brings a breadth of research and teaching experience to the discussions of social and emotional development. It is also more interactive than ever before, with richer integration between the book and its interactive study features in LaunchPad.

Biopsychology Aug 15 2022 Pinel encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to the reader. For undergraduate junior/senior level courses in Behavioral Neuroscience, Physiology of Behavior, Biopsychology, Human Neuropsychology, or Physiological

Psychology. Biopsychology is an introduction to the study of the biology of behavior; it focuses on the neural mechanisms of psychological processes. The defining feature of Biopsychology is its unique combination of cutting-edge biopsychological science and student-oriented discourse. Rather than covering topics in the usual textbook fashion, it interweaves the fundamentals of the field with clinical case studies, personal implications, social issues, helpful metaphors, and memorable anecdotes.

Essentials in Human Factors Jun 13 2022 No sweeping epics here, these collected poems are essentially lyrical vignettes, mood-evocations drawn from experience, imagination, and an introspective sifting through the human contentions and passions. Melancholic in tone (even the few comic pieces spring from irony) the book's motifs bypass the transient social and political issues, pursuing the ineffable, beauty's elusive order, the flickering lights in the darkness of life's angst. The four-part, sub-titled, format takes the basic themes through their separate perspectives, and the attentive reader will find several if subtle threads, echoes, in the book's construction, supporting a sense of progression and closure.

A Mind that Found Itself Mar 18 2020 I am not telling the story of my life just to write a book. I tell it because it seems my plain duty to do so. A narrow escape from death and a seemingly miraculous return to health after an apparently fatal illness are enough to make a man ask himself: For what purpose was my life spared? That question I have asked myself and this book is in part an answer.

Psychiatric-Mental Health Nursing Jul 22 2020 A Practical Focus on the Skills and Concepts Essential to Your Success With an accessible, clear and student-friendly approach, Psychiatric-Mental Health Nursing clarifies challenging concepts and helps you build a foundation for working successfully with clients experiencing mental health challenges regardless of care setting. The text explores the full spectrum of psychiatric nursing, helping you master specific nursing interventions, hone your therapeutic communication skills and learn to apply content effectively within the framework of the nursing process. New! Unfolding Patient Stories written by the National League for Nursing put the nursing process in a realistic context to prepare you for successful client interactions and interventions. Clinical Vignettes familiarize you with

the features of major disorders you are likely to encounter in practice. Therapeutic Dialogues help you perfect your communication skills with specific examples of nurse-client interactions. Best Practice boxes provide the latest evidence-based findings in psychiatric nursing. Self-Awareness features foster your personal and professional development through self-reflection. Concept Mastery Alerts clarify important concepts essential to your classroom and clinical success. Watch and Learn icons point you to corresponding true-to-life Lippincott® Theory to Practice Video Series videos for a richer understanding of important mental health disorders. Built-In Study Guide reinforces your understanding with multiple-choice questions, multiple-response questions and clinical examples at the end of each chapter. Nursing Care Plans demonstrate effective approaches for addressing specific client disorders. Drug Alerts highlight essential concerns related to psychotropic drugs. Warning boxes alert you to FDA considerations for specific medications. Cultural Considerations help you ensure culturally sensitive care for a wide range of client populations. Elder Considerations sections prepare you to care for the growing population of older adults. Client/Family Education boxes boost your teaching capabilities. Nursing Interventions detail key treatment strategies for specific disorders. DSM-5 Diagnostic Criteria boxes summarize the medical diagnostic features of specific disorders.

Presence of Mind Sep 23 2020

Learning and Behavior Sep 04 2021 LEARNING AND BEHAVIOR, Seventh Edition, is stimulating and filled with high-interest queries and examples. Based on the theme that learning is a biological mechanism that aids survival, this book embraces a scientific approach to behavior but is written in clear, engaging, and easy-to-understand language. Available with InfoTrac Student Collections <http://goengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

A History of Modern Psychology in Context Jan 28 2021 A fresh look at the history of psychology placed in its social, political, and cultural contexts A History of Modern Psychology in Context presents the history of modern psychology in the richness of its many contexts. The authors resist the traditional storylines of great achievements by eminent people, or schools of

thought that rise and fall in the wake of scientific progress. Instead, psychology is portrayed as a network of scientific and professional practices embedded in specific temporal, social, political, and cultural contexts. The narrative is informed by three key concepts—indigenization, reflexivity, and social constructionism—and by the fascinating interplay between disciplinary Psychology and everyday psychology. The authors complicate the notion of who is at the center and who is at the periphery of the history of psychology by bringing in actors and events that are often overlooked in traditional accounts. They also highlight how the reflexive nature of Psychology—a science produced both by and about humans—accords history a prominent place in understanding the discipline and the theories it generates. Throughout the text, the authors show how Psychology and psychologists are embedded in cultures that indelibly shape how the discipline is defined and practiced, the kind of knowledge it creates, and how this knowledge is received. The text also moves beyond an exclusive focus on the development of North American and European psychologies to explore the development of psychologies in other indigenous contexts, especially from the mid-20th-century onward.

Biopsychology [RENTAL EDITION] Dec 19 2022

Cognition and Crime Aug 23 2020 The rational choice perspective developed by Cornish and Clarke in 1986 provides criminologists with a valuable and practical framework for purposes of crime control and prevention. More than twenty-five years later, Cognition and Crime pushes the boundaries of this field of research by bringing together international leading (or emerging) researchers in this area of script analysis into a single volume for the first time. It also presents a series of original contributions on offender decision-making during crime and crime script analysis as well as offering a critical perspective of what could be achieved in the future to further help develop this field of research for prevention purposes. In addition, each empirical chapter treats a specific and important form of crime such as stalking violence, drug dealing, human trafficking for sexual exploitation, child sexual abuse, and transnational illegal market of endangered species. Academics and students from various backgrounds, and interested in investigating and preventing crime, will benefit from this book as it applies crime script analysis and discusses new and future developments in regards to

this approach and the rational choice perspective. This volume will be of particular relevance for practitioners such as police officers and crime investigators.

The Archaeology of Knowledge Jul 02 2021 Madness, sexuality, power, knowledge—are these facts of life or simply parts of speech? In a series of works of astonishing brilliance, historian Michel Foucault excavated the hidden assumptions that govern the way we live and the way we think. The Archaeology of Knowledge begins at the level of "things said" and moves quickly to illuminate the connections between knowledge, language, and action in a style at once profound and personal. A summing up of Foucault's own methodological assumptions, this book is also a first step toward a genealogy of the way we live now. Challenging, at times infuriating, it is an absolutely indispensable guide to one of the most innovative thinkers of our time.

Women's Lives Jun 20 2020 This cutting-edge and comprehensive fourth edition of *Women's Lives: A Psychological Perspective* integrates the most current research and social issues to explore the psychological diversity of girls and women varying in age, ethnicity, social class, nationality, sexual orientation, and ability. Written in an engaging and accessible manner, its use of vignettes, quotes, and numerous pedagogical tools effectively fosters students' engagement, active learning, critical thinking, and social activism. New information covered includes: neoliberal feminism, standpoint theory, mujerista psychology (Chapter 1) LGBT individuals and individuals with disabilities in media (Chapter 2) testosterone testing of female athletes, precarious manhood (Chapter 3) raising a gender non-conforming child, impact of social media on body image (Chapter 4) gender differences in narcissism and Big Five personality traits, women video-game designers (Chapter 5) asexuality, transgender individuals, sexual agency, "Viagra for women" controversy (Chapter 6) adoption of frozen embryos controversy (Chapter 7) intensive mothering, integrated motherhood, "living apart together", same-sex marriage (Chapter 8) single-sex schooling controversy (Chapter 9) combat roles opened to U.S. women, managerial derailment (Chapter 10) work-hours dilemmas of low-wage workers (Chapter 11) feminist health care model, health care for transgender individuals, Affordable Care

Act (Chapter 12) feminist critique of CDC guidelines on women and drinking (Chapter 13) cyberharassment, gendertrolling, campus sexual assault (Chapter 14) transnational feminism, men and feminism (Chapter 15) Women ' s Lives stands apart from other texts on the psychology of women because it embeds within each topical chapter a lifespan approach and robust coverage of the impact of social, cultural, and economic factors in shaping women ' s lives around the world. It provides extensive information on women with disabilities, middle-aged and older women, and women in transnational contexts. Its up-to-date coverage reflects current scientific and social developments, including over 2,200 new references. This edition also adds several new boxed features for student engagement. In The News boxes present current, often controversial, news items to get students thinking critically about real-life applications of course topics. Get Involved boxes encourage students to actively participate in the research process. What You Can Do boxes give students applied activities to promote a more egalitarian society. Learn About the Research boxes expose students to a variety of research methods and highlight the importance of diversity in research samples by including studies of underrepresented groups.

Essentials of Understanding Abnormal Behavior Nov 25 2020
ESSENTIALS OF UNDERSTANDING ABNORMAL BEHAVIOR, 3rd Edition offers the same multidimensional focus, multicultural emphasis, topical coverage, and engaging style as its comprehensive counterpart -- UNDERSTANDING ABNORMAL BEHAVIOR -- in a condensed, student-friendly format. Updated to reflect DSM-5 and the newest scientific, psychological, multicultural, and psychiatric research, the text introduces and integrates the Multipath Model of Mental Disorders to explain how biological, psychological, social, and sociocultural factors interact to cause mental disorders. A focus on resilience highlights prevention and recovery from the symptoms of various disorders, and the book also continues its emphasis on the multicultural, sociocultural, and diversity aspects of abnormal psychology. The authors present material in a lively and engaging manner, connecting topics to real-world case studies, current events, and issues of particular importance and relevance to college students. Important Notice: Media content referenced within the product description or the product text may not

Big Two-Hearted River Nov 13 2019 Ernest Hemingway 's landmark 1925 short story of a veteran 's solo fishing trip in Michigan 's Upper Peninsula, now published for the first time ever as a stand-alone work, illustrated with specially commissioned original artwork by master engraver Chris Wormell and featuring a foreword by John N. Maclean. A century since its publication in the collection *In Our Time*, "Big Two-Hearted River" has helped shape language and literature in America and across the globe, and its magnetic pull continues to draw readers, writers, and critics. It 's the best early example of Ernest Hemingway 's now-familiar writing style: short sentences, punchy nouns and verbs, few adjectives and adverbs, and a seductive cadence. Easy to imitate, difficult to match. The subject matter of the story has inspired generations of writers to believe that fly fishing can be literature. More than any of his stories, it depends on his "iceberg theory" of literature, the notion that leaving essential parts of a story unsaid, the underwater portion of the iceberg, adds to its power. Taken in context with his other work, it marks Hemingway 's passage from boyish writer to accomplished author: nothing big came before it, novels and stories poured out after it. Featuring a foreword by John N. Maclean, author of *Home Waters*, and gorgeously illustrated, this newly released classic is an essential addition to the Hemingway canon.

Biopsychology (Custom Edition) Jun 01 2021 This custom edition is published for the University of Queensland. The material included in this custom edition has been specifically chosen from Pinel and Barnes' *Introduction to Biopsychology* Global edition, 9th edition to meet your course requirements

Le Morte D'Arthur Mar 30 2021

Encountering Crises of the Mind Dec 27 2020 *Encountering Crises of the Mind* offers social and cultural historical perspectives to mental illness from late medieval times to modern age.

Biological Psychology Oct 05 2021 Dr. James W. Kalat's **BIOLOGICAL PSYCHOLOGY** is the most widely used text in the course area, and for good reason: an extremely high level of scholarship, clear and occasionally humorous writing style, and precise examples. Throughout all eleven editions,

Kalat's goal has been to make biological psychology accessible to psychology students, not just to biology majors and pre-meds. Another goal has been to convey the excitement of the search for biological explanations of behavior, and Kalat delivers. Updated with new topics, examples, and recent research findings--and supported by new online bio-labs, part of the strongest media package yet--this text speaks to today's students and instructors. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Biopsychology, Global Edition Oct 17 2022 Learn more about how the central nervous system governs human behaviour with an industry-leading text. Biopsychology, Global Edition, 11th Edition by authors John Pinel and Steven Barnes presents a clear, engaging introduction to the topic offering a unique combination of biopsychological science and personal, reader-oriented discourse, ideal for students studying Physiological Psychology and Biopsychology courses. Well-known for its accessible and student-focused approach to the discipline, the book successfully interweaves the fundamentals of the field with clinical case studies, social issues, personal implications, useful metaphors, and memorable anecdotes. The plethora of themed features, and visual illustrations will challenge your critical thinking skills and support your understanding of the concepts introduced. The latest Edition also incorporates two new emerging themes ("Thinking About Epigenetics" and "Consciousness") and includes up-to-date coverage of the most recent developments in the field. With the engaging, inspiring voices coming from the authors directly to the student, this market-leading text is the ultimate introductory guide, equipping you with the tools and resources you need for a deeper understanding of one of the most rapidly progressing scientific fields. Organise your learning and improve your results with the Revel® Edition for this text. The interactive, digital, and mobile learning environment replaces the traditional printed text and empowers you to actively participate in learning. More than a digital textbook, Revel delivers an engaging blend of author content, media, and assessment. With Revel, you can read and practice in one continuous experience – anytime, anywhere, on any device. If you would like to purchase the Revel® version of this text, search for: 9781292351964 Revel for Biopsychology, Global Edition, Instant Access

Social Psychology Feb 15 2020 An award-winning author team challenges students to think critically about the concepts, controversies, and applications of social psychology using abundant tools, both in text and online. (NEW) infographics examine important topics like social class, social media effects, and research methodology. InQuizitive online assessment reinforces fundamental concepts, and PowerPoints, test questions, and (NEW) Concept Videos, will help you create the best course materials in the shortest amount of time.

The Last Poets Dec 07 2021 A daring and imaginative novel based on the lives of The Last Poets, New York's legendary Hip-Hop pioneers from the ghettos.

Mind Design Nov 06 2021 Mind Design: The Adaptive Organization of Human Nature, Minds, and Behavior does what most books on the subject don't do. It deals with the "big questions" in psychology and philosophy from an evolutionary neuroscience perspective. This highly readable volume provides a provocative look at the evolutionary origins and neurophysiological underpinnings of mind--including free will, the self, biological origins of the duality of human moral nature, human mate value and mate selection, the sensory/perceptual systems as adaptive virtual reality machines, and the emotions, intelligence, and consciousness as evolved psychological adaptations.

Biopsychology Feb 21 2023 "Biopsychology, 9/e, introduces the study of the biology of behavior; that is, the neural mechanisms of psychological processes in the central nervous system. This program combines biopsychological science and student-oriented discussion, interweaving the basics of this specialized field with clinical case studies and exploring the personal and social implications that arise. The author encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to readers."--Publisher.

Transforming the Workforce for Children Birth Through Age 8 Apr 30 2021 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young

children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Introduction to Biopsychology, Global Edition Apr 11 2022 Were you looking for the book with access to MyPsychLab? This product is the book alone, and does NOT come with access to MyPsychLab. Buy Introduction to Biopsychology with MyPsychLab access card 9e (ISBN 9781292059297) if you need access to the MyLab as well, and save money on this brilliant resource. Delves into how the central nervous system governs behaviour Introduction to Biopsychology, 9/e, introduces the study of the biology of behaviour; that is, the neural mechanisms of psychological processes in the central nervous

system. This program combines biopsychological science and student-oriented discussion, interweaving the basics of this specialized field with clinical case studies and exploring the personal and social implications that arise. The author encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to readers.

Introduction to Biopsychology Jan 20 2023 Pinel's textbook presents the fundamentals of the study of the biology of behaviour and makes the topics personally and socially relevant to the student. A key feature of 'Introduction to Biopsychology' is its combination of biopsychological science and personal, reader-oriented discourse.

Statistics for The Behavioral Sciences Apr 18 2020 This field-leading introduction to statistics text for students in the behavioral and social sciences continues to offer straightforward instruction, accuracy, built-in learning aids, and real-world examples. The goals of **STATISTICS FOR THE BEHAVIORAL SCIENCES**, 10th Edition are to teach the methods of statistics and convey the basic principles of objectivity and logic that are essential for science -- and valuable in everyday life. Authors Frederick Gravetter and Larry Wallnau help students understand statistical procedures through a conceptual context that explains why the procedures were developed and when they should be used. Students have numerous opportunities to practice statistical techniques through learning checks, examples, step-by-step demonstrations, and problems. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Foundations of Behavioral Neuroscience Feb 09 2022 Helps apply the research findings of behavioral neuroscience to daily life. The ninth edition of **Foundations of Behavioral Neuroscience** offers a concise introduction to behavioral neuroscience. The text incorporates the latest studies and research in the rapidly changing fields of neuroscience and physiological psychology. The theme of strategies of learning helps readers apply these research findings to daily life. **Foundations of Behavioral Neuroscience** is an ideal choice for the instructor who wants a concise text with a good balance of human and animal studies. MyPsychLab is an integral part of the Carlson program. Key learning

applications include the MyPsychLab Brain. Teaching & Learning Experience Personalize Learning - MyPsychLab is an online homework, tutorial, and assessment program. It helps students prepare for class and instructor gauge individual and class performance. Improve Critical Thinking -Each chapter begins with a list of Learning Objectives that also serve as the framework for the Study Guide that accompanies this text. Engage Students -An Interim Summary follows each major section of the book. The summaries provide useful reviews and also break each chapter into manageable chunks. Explore Theory/Research - APS Reader, Current Directions in Biopsychology in MyPsychLab Support Instructors - A full set of supplements, including MyPsychLab, provides instructors with all the resources and support they need. This Book a la Carte Edition is an unbound, three-hole punched, loose-leaf version of the textbook and provides students the opportunity to personalized their book by incorporating their own notes and taking the portion of the book they need to class - all at a fraction of the bound book price.
