Principles and Practice in Second Language Acquisition Jan 06 2021 The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

Service Orientation in Holonic and Multi-Agent Manufacturing Feb 14 2022
This book gathers the peer-reviewed papers presented at the 8th edition of the International Workshop "Service Orientation in Holonic and Multi-Agent Manufacturing – SOHOMA'18" held at the University of Bergamo, Italy on June 11–12, 2018. The objective of the SOHOMA annual workshops is to foster innovation in smart and sustainable manufacturing and logistics systems by promoting new concepts, methods and solutions that use service orientation of agent-based control technologies with distributed intelligence. Reflecting the theme of SOHOMA'18: "Digital transformation of manufacturing with agent-based control and service orientation of Internet-scale platforms", the research included focuses on how the digital transformation, as advocated by the "Industry 4.0", "Industrial Internet of Things", "Cyber-Physical Production Systems" and "Cloud Manufacturing" frameworks, improves the efficiency, agility and sustainability of manufacturing processes, products, and services, and how it relates to the interaction between the physical and informational worlds, which is implemented in the virtualization of products, processes and resources managed as services.

Drugs During Pregnancy and Lactation Sep 09 2021 Drugs During Pregnancy and Lactation, 3rd Edition is a quick and reliable reference for all those working in disciplines related to fertility, pregnancy, lactation, child health and human genetics who prescribe or deliver medicinal products, and to those who evaluate health and safety risks. Bastards Aug 28 2020 Children born out of wedlock were commonly stigmatized as "bastards" in early modern France. Deprived of inheritance, they were said to have neither kin nor kind, neither family nor nation. Why was this the case? Gentler alternatives to "bastard" existed in early modern French discourse, and many natural parents voluntarily recognized and cared for their extramarital offspring. Drawing upon a wide array of archival and published sources, Matthew Gerber has reconstructed numerous disputes over the rights and disabilities of children born out of wedlock in order to illuminate the changing legal condition and practical treatment of extramarital offspring over a period of two and half centuries. Gerber's study reveals that the exclusion of children born out of wedlock from the family was perpetually debated. In sixteenth- and seventeenth-century France, royal law courts intensified their stigmatization of extramarital offspring even as they usurped jurisdiction over marriage from ecclesiastic courts. Mindful of preserving elite lineages and dynastic succession of power, reform-minded jurists sought to exclude illegitimate children more thoroughly from the household. Adopting a strict moral tone, they referred to illegitimate children as "bastards" in an attempt to underscore their supposed degeneracy. Hostility toward extramarital offspring culminated in 1697 with the levying of a tax on illegitimate offspring. Contempt was never unanimous, however, and in the absence of a unified body of French law, law courts became vital sites for a highly contested cultural construction of family. Lawyers pleading on behalf of extramarital offspring typically

referred to them as "natural children." French magistrates grew more receptive to this sympathetic discourse in the eighteenth century, partly in response to soaring rates of child abandonment. As costs of "foundling" care increasingly strained the resources of local communities and the state, some French elites began to publicly advocate a destigmatization of extramarital offspring while valorizing foundlings as "children of the state." By the time the Code Civil (1804) finally established a uniform body of French family law, the concept of bastardy had become largely archaic. With a cast of characters ranging from royal bastards to foundlings, *Bastards* explores the relationship between social and political change in the early modern era, offering new insight into the changing nature of early modern French law and its evolving contribution to the historical construction of both the family and the state.
