Ready to Learn FL Studio with Proven Results? This book is written by GratiTous. A long-time user and educator of the FL Studio software by Image-Line. Who is this book for? It is for both beginner and advanced producers alike. Welcome to Step 1 of GratiTous' 3-Step Proven Process of Learning FL Studio Students have told me this book has been pivotal in their understanding when it came to actually getting hands-on with the FL Studio software. They were already aware of my favorite keyboard shortcuts, and enabling certain features in FL Studio which DO NOT come default when you first install it! Book Description: FL Studio Beginner's Book by GratiTous When I first started producing music, it was at a time where there were few tutorials to help me jumpstart and accelerate at this craft of music production. I wrote this book to share my fast workflow, favorite keyboard shortcuts, and how to use FL Studio with best practices. FL Studio is an amazing DAW, but at times, can be a bit quirky in how certain tasks are approached. But, FL Studio is not to be taken lightly (being used by MANY famous music producers!) If you're wanting to learn how to use FL Studio, I teach you how to learn faster, where to look and find the information you need, and how to apply these tricks in a real world practice. We break down the Channel Rack, Playlist, Piano Roll, and Mixer, while revealing my favorite options to enable which make music production more enjoyable within Image-Line's software, FL Studio. More topics covered are how audio signal flow works inside FL Studio's mixer with series and parallel processing (to get the perfect mix), different ways you can approach making a beat, and how to get the best performance out of the FL Studio software! Finally, you are shown why creating your own dedicated music production folder is so important if you're wanting to take this endeavor of music production seriously. Missing files and a poor folder structure pull you away from your creativity and focus of learning this software. Beginners and advanced producers alike, come learn how GratiTous uses FL Studio. I've worked with a GRAMMY-Nominated recording artist, and have created many music production video courses! Filled with in-depth descriptions and images, you can learn FL Studio, too! # GratiTous David Gibson uses 3D visual representations of sounds in a mix as a tool to explain the dynamics that can be created in a mix. This book provides an in-depth exploration into the aesthetics of what makes a great mix. Gibson's unique approach explains how to map sounds to visuals in order to create a visual framework that can be used to analyze what is going on in any mix. Once you have the framework down, Gibson then uses it to explain the traditions that have been developed over time by great recording engineers for different styles of music and songs. You will come to understand everything that can be done in a mix to create dynamics that affect people in really deep ways. Once you understand what engineers are doing to create the great mixes they do, you can then use this framework to develop your own values as to what you feel is a good mix. Once you have a perspective on what all can be done, you have the power to be truly creative on your own – to create whole new mixing possibilities. It is all about creating art out of technology. This book goes beyond explaining what the equipment does – it explains what to do with the equipment to make the best possible mixes. To get started with this book, all you need is a computer and FL Studio. Audio Painting is a term coined by GratiTous. A recording artist and producer who has worked with a GRAMMY-Nominated artist. If you've been producing for awhile, you already know you can make a beat. But if you keep comparing your beats to commercial releases and feel that commercial releases just have that extra touch that yours don't, it's probably because they do. Audio Painting takes a listener on a journey just as one would when looking at a real-life painting. But in audio, we not only have different tools to take them on this journey, we have to force them to take this ride, just as if someone were to hop on a roller coaster. The listener has no control over the ride, they just get to enjoy the experience; we producers are the ones building that roller coaster. We choose when the roller coaster builds up to that big drop, speeds through fast corners, or goes around a huge loop! The biggest part we producers must understand is communication with our listeners, preparing them for what's next in our song. We communicate by how we arrange our song, where we place transitions and the type of transition used, and literally taking our listeners on an emotional roller coaster from beginning to end in our music. Once you have your eyes opened to this concept, I believe you will have a much different outlook on your music productions.
