Encyclopedia of Cross-Cultural School Psychology Feb 15 2022 With contributions from leading school psychology practitioners, this encyclopedia provides a one-of-a-kind guide to cross-cultural school psychology. Some 400 entries explore concepts, themes, and the latest research findings to answer your questions in all aspects of the field. Moreover, the encyclopedia offers support at all levels of primary and secondary education, from pre-K to 12th grade. Each entry offers a description of a particular term, a bibliography, and additional readings. The editor is widely known for her bi-weekly Spanish-language columns and her appearances on television and radio as a cross-cultural expert.

Cases on Educational Technology Planning, Design, and Implementation: A Project Management Perspective Oct 23 2022 Whether utilizing electronic tools for K-12 classrooms, learning management systems in higher education institutions, or training and performance improvement for business organizations, technology maintains an important aspect in the delivery of education and training in both school and non-school settings. *Cases on Educational Technology Planning, Design, and Implementation: A Project Management Perspective* provides strategies for addressing the challenges and pitfalls faced when planning, designing, and implementing learning and educational technology projects. The case studies in this publication aim to provide instructors, practitioners in K-12 and higher education, business managers as well as students interested in implementing education technology projects.

How to Grade for Learning, K-12 Oct 19 2019 Implement standards-based grading practices that help students succeed! The new edition of this bestseller demonstrates how to improve grading practices by linking grades with standards and establishing policies that better reflect student achievement. Ken O'Connor updates eight guidelines for good grading, provides practical applications, and examines a number of additional grading issues, including grade point average calculation and computer grading programs.

Thoroughly revised, this edition includes: A greater emphasis on standards-based grading practices Updated research and additional information on feedback and homework New sections on academic dishonesty, extra credit, and bonus points Additional information on utilizing level scores Reflective exercises

Developing Core Literacy Proficiencies, Grade 12 Dec 01 2020 The Developing Core Literacy Proficiencies program is an integrated set of English Language Arts/Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards (CCSS). Reading Closely for Textual Details Making Evidence-Based Claims Making Evidence-Based Claims about Literary Technique (Grades 9-12) Researching to Deepen Understanding Building Evidence-Based Arguments The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way. Knowledge: The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time, but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. Literacy Skills: The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from "making inferences" to "reflecting critically." Students focus on this set of twenty skills throughout the year and program, continually applying them in new and more sophisticated ways. Academic Habits: The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as "preparing" and "completing tasks" that are essential to students' success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system, centered around the literacy skills and academic habits, allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels.

Information & Technology Literacy Standards Matrix May 06 2021 Intended to help library media specialists, technology educators, and curriculum planning teams identify where specific information and technology competencies might best fit into the assessed content areas of the curriculum, this document presents a matrix that identifies the correlation between Wisconsin's Information and Technology Literacy (ITL) Standards and English language arts, mathematics, science, and social studies standards. An introductory section describes the Matrix Project, the Matrix Project Advisory Group, academic standards definitions, the matrix models, and the list of integration resources. The second section presents Matrix Model 1, which correlates content standards for each of the four curriculum areas with the ITL Standards. The third section presents Matrix Model 2, which separates the four content standards of the ITL Standards (i.e., media and technology, information and inquiry, independent learning, and the learning community) and arranges them by three grade ranges--K-4, 5-8, and 9-12. The final section provides a listing of resources and resource providers for those educators desiring additional information or ideas on how to integrate information and technology competencies into curriculum and classroom instruction; several World Wide Web sites that contain evaluated lesson plans, many of which incorporate information and technology skills, are included.
