The Pursuit of Power Aug 01 2021 In this magnificent synthesis of military, technological, and social history, William H. McNeill explores a whole millennium of human upheaval and traces the path by which we have arrived at the frightening dilemmas that now confront us. McNeill moves with equal mastery from the crossbow—banned by the Church in 1139 as too lethal for Christians to use against one another—to the nuclear missile, from the sociological consequences of drill in the seventeenth century to the emergence of the military-industrial complex in the twentieth. His central argument is that a commercial transformation of world society in the eleventh century caused military activity to respond increasingly to market forces as well as to the commands of rulers. Only in our own time, suggests McNeill, are command economies replacing the market control of large-scale human effort. *The Pursuit of Power* does not solve the problems of the present, but its discoveries, hypotheses, and sheer breadth of learning do offer a perspective on our current fears and, as McNeill hopes, "a ground for wiser action."

The Gaelic Peoples and Their Archaeological Identities, A.D. 1000-1650 Apr 16 2020

A.D. 1000 Dec 17 2022 Tracing the career of brilliant visionary Pope Sylvester II, Richard Erdoes has composed a vivid tapestry of a century frighteningly similar to our present one. Maps, charts and tables.

The Northern Counties to AD 1000 Oct 03 2021 "The Northern Counties to AD 1000 deals with the prehistory and early history of the most northerly region of England, covering the historical counties of Northumberland, Durham, Cumberland, Westmorland and Lancashire north of the Sands. The greater part of the source material derives, from archaeological or palaeoenvironmental research, though there are more conventional historical sources for the interlude of the Roman occupation and for the golden age of Anglo-Saxon Northumbria and its aftermath, with which the volume closes. Dr Higham has not been content solely to organise evidence into the usual framework of successive human cultures; rather, he has preferred to concentrate on the ways the local community adapted itself to changing environmental conditions, and changing technological and social possibilities. He also makes the underlying assumption of the genetic continuity of this population from the late mesolithic onwards, despite the impact of the specific migrations which demonstrably took place. In addition he shows how changing climatic and environmental conditions acted as a catalyst between human population levels, the demands made by man, and the environment on which those demands were made. In doing so, he stresses the responsibility of man for impoverishing that environment."--

What Life was Like Among Samurai and Shoguns Dec 13 2019 A comprehensive view of how the Samurai and Shoguns lived in Japan, their discipline and battle gear as well as other facts about typical behavior.

Battles of the British Navy: from A.D. 1000 to 1840 Mar 16 2020

The Year 1000 May 30 2021 From celebrated Yale professor Valerie Hansen, a groundbreaking work of history showing that bold explorations and daring trade missions connected all of the world's great societies for the first time at the end of the first millennium. People often believe that the years immediately prior to AD 1000 were, with just a few exceptions, lacking in any major cultural developments or geopolitical encounters, that the Europeans hadn't yet reached North America, and that the farthest feat of sea travel was the Vikings' invasion of Britain. But how, then, to explain the presence of blonde-haired people in Maya temple murals at Chichén Itzá, Mexico? Could it be possible that the Vikings had found their way to the Americas during the height of the Maya empire? Valerie Hansen, an award-winning historian, argues that the year 1000 was the world's first point of major cultural exchange and exploration. Drawing on nearly thirty years of research, she presents a compelling account of first encounters between disparate societies, which sparked conflict and collaboration eerily reminiscent of our contemporary moment. For readers of Jared Diamond's *Guns, Germs, and Steel* and Yuval Noah Harari's *Sapiens*, *The Year 1000* is an intellectually daring, provocative account that will

make you rethink everything you thought you knew about how the modern world came to be. It will also hold up a mirror to the hopes and fears we experience today.

The Northern Counties from AD 1000 Oct 11 2019 Informative, vivid and richly illustrated, this volume explores the history of England's northern borders – the former counties of Northumberland, Cumberland, Durham, Westmorland and the Furness areas of Lancashire – across 1000 years. The book explores every aspect of this changing scene, from the towns and poor upland farms of early modern Cumbria to life in the teeming communities of late Victorian Tyneside. In their final chapters the authors review the modern decline of these traditional industries and the erosion of many of the region's historical characteristics.

The Medieval Warrior Jan 18 2023 The essential visual guide to the warriors of the Middle Ages This richly illustrated book provides an overview of the medieval world and a guide to the typical battlefield and the armies that populated it. From the Battle of Hastings to the Battle of Agincourt, see in detail how the weapons and fighting tactics of archers, artillerymen, bowmen, knights, and even peasants developed over the centuries. Chapters cover mounted knights, foot soldiers, missile troops, and siege weapons and techniques. More than 300 color images and maps depict weapons, armor, equipment, and fighting tactics. Step-by-step illustrations demonstrate combat skills, including how to fire a longbow, fight with a sword and a buckler, attack with a lance, defend

The Western European Loess Belt Mar 28 2021 This book deals with the early history of agriculture in a defined part of Western Europe: the loess belt west of the river Rhine. It is a well-illustrated book that integrates existing and new information, starting with the first farmers and ending when food production was no longer the chief source of livelihood for the entire population. The loess belt was chosen because it is a region with only one type of soil and climate as these are all-important factors where farming is concerned. Subjects covered are crops, crop cultivation, livestock and livestock handling, the farm and its yard, and the farm in connection with other farms. Crop plants and animals are described, together with their origin. New tools such as the plough, when, wagon and scythe

are introduced. Groundplans of farm buildings, the history of the outhouse and the presence or absence of hamlets are presented as well, and the impact of farming on the landscape is not forgotten. The loess belt was not an island and the world beyond its boundaries was important for new ideas, new materials and new people. Summarising six millennia of agriculture, the thinking in terms of the Western European loess belt as one agricultural-cultural unit seems justified.

Wessex from AD 1000 Feb 13 2020

The Catholic Church and European State Formation, AD 1000-1500 Jun 11 2022 Generations of social scientists and historians have argued that the escape from empire and consequent fragmentation of power - across and within polities - was a necessary condition for the European development of the modern territorial state, modern representative democracy, and modern levels of prosperity. The Catholic Church and European State Formation, AD 1000-1500 inserts the Catholic Church as the main engine of this persistent international and domestic power pluralism, which has moulded European state-formation for almost a millennium. The 'crisis of church and state' that began in the second half of the eleventh century is argued here as having fundamentally reshaped European patterns of state formation and regime change. It did so by doing away with the norm in historical societies - sacral monarchy - and by consolidating the two great balancing acts European state builders have been engaged in since the eleventh century: against strong social groups and against each other. The book traces the roots of this crisis to a large-scale breakdown of public authority in the Latin West, which began in the ninth century, and which at one and the same time incentivised and permitted a religious reform movement to radically transform the Catholic Church in the period from the late tenth century onwards. Drawing on a unique dataset of towns, parliaments, and ecclesiastical institutions such as bishoprics and monasteries, the book documents how this church reform movement was crucial for the development and spread of self-government (the internal balancing act) and the weakening of the Holy Roman Empire (the external balancing act) in the period AD 1000-1500.

Ancient Europe 8000 B.C.--A.D. 1000 Apr 09 2022 Online version of the 2-volume work, published: New York : Charles Scribner's Sons, 2004.

The Northern Counties from Ad 1000 Aug 13 2022 Informative, vivid and richly illustrated, this volume explores the history of England's northern borders ; the former counties of Northumberland, Cumberland, Durham, Westmorland and the Furness areas of Lancashire ; across 1000 years. The book explores every aspect of this changing scene, from the towns and poor upland farms of early modern Cumbria to life in the teeming communities of late Victorian Tyneside. Cities And The Rise Of States In Europe, A.d. 1000 To 1800 Mar 08 2022 The rise of large, powerful states in Europe after 1000 a.d. transformed life across the Continent and eventually through the whole world. The new European states disposed of unprecedented stores of capital and vast military capacities. In recent decades, scholars have often drawn general models of state formation from the European experience after 1700, then applied them with only partial success to other parts of the world. Although such studies of modern Europe improved on early theories of modernization and development, they failed to accommodate the varied ways in which city-states, empires, federations, centralized states, and other forms of government evolved and the pivotal role that cities played in the multiple paths to state formation. In a sweeping, original work detailing eight centuries of city-state relations, Charles Tilly, Wim P. Blockmans, and their contributors document differences in political trajectories from one part of Europe to another and provide authoritative surveys of urbanization in nine major regions; they also suggest many correctives to previous analyses of state formation. They show that the variable distribution of cities significantly and independently constrained state formation and that states grew differently according to the character of urban networks in a given region. Their systematic study shows that unilinear models of state transformation underestimate the contingency and variability of popular and elite compliance with state-building activities. The book's findings offer important implications for the nature of economy, sovereignty, warfare, state power, and social change throughout the world.

The High Middle Ages Oct 15 2022 "The High Middle Ages" covers a period of recovery between two of the darkest periods in

European history. Farming innovations, the growth of monarchical rule, the dramatic rebirth of towns and cities, and the formation of the world's first universities are among the topics vividly documented in this richly illustrated text. You will also find informational texts about the Crusades. Challenging review questions encourage meaningful reflection and historical analysis. A unit test and answer key are included.

Europe Between the Oceans Feb 19 2023 By the fifteenth century Europe was a driving world force, but the origins of its success have until now remained obscured in prehistory. In this book, distinguished archaeologist Barry Cunliffe views Europe not in terms of states and shifting political land boundaries but as a geographical niche particularly favored in facing many seas. These seas, and Europe's great transpeninsular rivers, ensured a rich diversity of natural resources while also encouraging the dynamic interaction of peoples across networks of communication and exchange. The development of these early Europeans is rooted in complex interplays, shifting balances, and geographic and demographic fluidity.

Greek and Latin Authors, 800 B.C.-A.D. 1000 Oct 23 2020 Biographical sketches of 376 Greek and Latin authors covering the years 800 B.C. to 1000 A.D. Includes a list of works of doubtful attribution and a chronological list of authors by century.

The Politics of Succession Jun 30 2021 The death of the ruler poses a significant threat to the stability of any polity. Arranging for a peaceful and orderly succession has been a formidable challenge in most historical societies, and it continues to be a test that modern authoritarian regimes regularly face and often fail. Drawing on a unique dataset of the life and fates of monarchs in all major monarchies in Medieval and Early Modern Europe, *The Politics of Succession* documents how succession have historically been moments of violence and insecurity. Deaths of rulers were often associated with civil war, and the shadow cast by looming successions caused coups and depositions. But this book also shows that the development and spread of primogeniture - the eldest-son-taking-the-throne - mitigated the problem of succession in Europe in the period after AD 1000. The predictability and stability that followed from a clear hereditary principle outweighed the problems of incompetent and irrational rulers sometimes inheriting power. The data used in the book demonstrates that primogeniture reduced the risk of depositions and civil war following the inevitable deaths of leaders. In this way, hereditary monarchy helped create political stability and lengthen the time horizons of rulers and elites alike, thereby facilitating state-building. The book thus sheds light on the rationale of a system of leader selection that today often appears illogical and outdated - and it uses these findings to shed light on the key advantage of modern representative democracy: its ability to complete power transfers peacefully.
