Through numerous examples drawn from their own experience, the authors show how the techniques involved can be integrated into everyday practice. The authors describe the different processes of using guided imagery and working from a script and show how drawing can be used to augment imagery work. In addition to planned strategies for using imagery, they also show how images which arise spontaneously during sessions can be harnessed and used to enhance the therapeutic process. The practical strategies and techniques outlined in the book are examined in the context of a variety of theoretical frameworks (the person-centred approach, gestalt, existentialism and psychosynthesis) and research findings. Potential pitfalls and ethical considerations are also explored, making Guided Imagery a useful resource for practitioners and an ideal text for use on counselling and psychotherapy training courses. Every day researchers face an onslaught of irrelevant, inaccurate, and sometimes insidious information. While new technologies provide powerful tools for accessing knowledge, not all information is created equal. Valuable information may be tucked away on a shelf, buried on the hundredth page of search results, or hidden behind digital barriers. With so many obstacles to effective research, it is vital that higher education students master the art of inquiry. Information Now is an innovative approach to information literacy that will reinvent the way college students think about research. Instead of the typical textbook format, it uses illustrations, humor, and reflective exercises to teach students how to become savvy researchers. Students will learn how to evaluate information, to incorporate it into their existing knowledge base, to wield it effectively, and to understand the ethical issues surrounding its use. Written by two library professionals, it incorporates concepts and skills drawn from the Association of College and Research Libraries' Information Literacy Competency Standards for Higher Education and their Framework for Information Literacy for Higher Education. Thoroughly researched and highly engaging, Information Now offers the tools that students need to become powerful consumers and creators of information. Whether used by a high school student tackling a big paper, an undergrad facing the newness of a university library, or a writer wanting to go beyond Google, Information Now is a powerful tool for any researcher's arsenal.
