The articles are selected from leading Korean newspapers, news magazines, and academic journals. \* In addition to the webzine, the content of Korea Focus is available via e-book service for mobile devices. Those who are interested in subscription may register their email address at the website. Every price is set by someone; this is where economics begins. Building on that fundamental idea and on Ayn Rand's

philosophy of Objectivism, Objective Economics transforms economics. The thesis of this book is that Ayn Rand's concept of "objective" is the indispensable base of valid economic thought. Consistently applying this idea across the board, the author reaches a general theory of price for the first time in the history of economic thought. This theory of price then provides a valid base for explaining how a free economy functions. Based on facts everyone knows, presented without graphs or higher mathematics, Objective Economics makes accessible to the intelligent layman a clear understanding of how the economy works. For everyone who found college economics impenetrable--and that is just about everyone--this is the book. The thesis of Objective Economics changes everything about economics, including economics' method, the conception of the economy, the meaning of competition, the idea of price, the nature of business costs, the concept of supply, the concept of demand, the law of supply and demand, the theory of price, and the theory of total national output. Overall, as the result of all the preceding, Objective Economics demonstrates that capitalism is the practical economic system. Since the beginning of the 21st century, China's energy diplomacy has been expanding rapidly and the country is searching for energy resources worldwide. This movement has not only improved China's energy security and international relations, but also enabled the Chinese national oil companies (NOCs) to access new investment markets and implement development strategies. The Chinese government and the NOCs need each other's support to realise their respective interests. The interaction between the government and the NOCs will have a critical influence on China's energy diplomacy. The Domestic Dynamics of China's Energy Diplomacy explores the long-neglected domestic dynamics of China's energy diplomacy, in particular the interaction of national and corporate interests. It argues that the convergence of national and corporate interests is the key momentum of China's energy diplomacy. It observes that the government-NOC relationship has been evolving with China's economic and enterprise reform. Finally, it tests the empirical evidence of the domestic dynamics of China's energy diplomacy against the three mainstream international political economy theories, showing their merits and shortcomings in explaining the phenomenon, before providing an alternative

conceptualisation of the movement. Oil has been central to regime survival for oil states across the Arabian Peninsula and has been at the heart of their attempts to defuse the wave of Arab revolutions. However, in 2011 revolution hit Libya, the most oil dependent regime in the Middle East. The political storm winds that have swept this region have thrown into doubt the resilience of Arab rentier states, and highlight how the political effects of oil vary across the oil producing countries. *Oil States in the New Middle East* brings together leading experts to critically assess the centrality of oil and the relevance of Rentier State Theory in light of the post-2011 upheaval across the Middle East and North Africa. It combines overall reflections on the political dynamics in oil states with focused case investigations of individual countries. Taking as its starting point the centrality of oil in explanations of regime survival, the book analyses how the oil states have responded to and fared throughout the Arab popular upheavals, resulting in a critical assessment of the continued relevance of Rentier State Theory. While observers have asked how the uprisings varied between oil and non-oil states, this book turns the comparative focus inward, arguing for a more fine-grained understanding of the political effects of oil in different oil producing countries. This book would be of interest to students and scholars of Middle East, North Africa and Gulf Studies, Oil and Politics, as well as Comparative Politics and International Political Economy. This book explains the increasingly turbulent Sino–Japanese relations since the 2000s by innovatively investigating the formation mechanism of mutual misperception deeply rooted in China–Japan–U.S. trilateral structural dynamics. The political and security relationship has been increasingly deteriorating against the high interdependency between the world’s second and third largest economies. More ironically, both sides have also shown the intent and made efforts to improve bilateral ties. The author systematically conducts a focused comparison of the evolution of the Sino–Japanese mutual perceptions and policies toward one another during the past decade and a half. Empirically, Yun Zhang closely examines five case studies that provide insights to IR students and scholars and policy makers on how misperception and mistrust have formed, replicated, and intensified. In the third volume of his Proof series, New York Times bestselling author Seth Abramson takes readers

on a deep dive into the Ukraine scandal, revealing it to be more sinister, complex, and transnational than previously thought. Abramson's research on Trump administration corruption positions the Ukraine scandal as the foreseeable culmination of years of clandestine machinations involving scores of players, from Beijing to Budapest, Ankara to Caracas, Warsaw to Jerusalem, Kyiv to Riyadh, and Moscow to D.C. While many know about the July 2019 telephone call that ignited the Ukraine scandal, most don't know about the concurrent attempts by members of Trump's inner circle to take over Ukraine's national gas company and bolster dangerous pro-Kremlin Ukrainian oligarchs—moves that would have benefited Putin and destabilized Ukraine's government and economy. In Beijing, Trump's dealings with the Chinese government not only enriched him and his family, but also culminated in him successfully seeking 2020 election interference from Xi Jinping in the form of closely held information about Joe Biden. In Venezuela, many of the actors involved in the Ukraine scandal engaged in similarly secretive, Kremlin-friendly negotiations that undermined U.S. policy. In Syria and Iraq, Trump's personal indebtedness to autocrats in Turkey, Israel, Saudi Arabia, and the UAE cost untold lives. And Abramson brings the story back to an increasingly fractured and depleted United States, where the COVID-19 pandemic exposes the staggering domestic consequences of the Trump administration's foreign machinations. In *Proof of Corruption*, Seth Abramson lays bare Trump's decades-long pattern of corruption. This globe-spanning narrative is an urgent warning about the unprecedented threat posed by a corrupt president and his administration.

*Producing Women* examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital

characteristics. She studies the means through which women market traditional female roles, are viewed, and produce and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media—including trash the dress wedding photography, Internet how-to instructions about zombie walk brides, nail polish blogging, DIY crafting, and reborn doll production—Producing Women elucidates women’s production cultures online, and the ways that individuals can critically study and engage with these practices. Trial by jury is not a fundamental part of the Japanese legal system, but there has been a recent important move towards this with the introduction in 2009 of the lay assessor system whereby lay people sit with judges in criminal trials. This book considers the debates in Japan which surround this development. It examines the political and socio-legal contexts, contrasting the view that the participation of ordinary citizens in criminal trials is an important manifestation of democracy, with the view that Japan as a society where authority is highly venerated is not natural territory for a system where lay people are likely to express views at odds with expert judges. It discusses Japan’s earlier experiments with jury trials in the late 19th Century, the period 1923-43, and up to 1970 in US-controlled Okinawa, compares developing views in Japan on this issue with views in other countries, where dissatisfaction with the jury system is often evident, and concludes by assessing how the new system in Japan is working out and how it is likely to develop. At the crossroads of various disciplines, this collective work examines the possibility of a new end-user “engagement” in ongoing digital/technological products and services development. It provides an overview of recent research specifically focused on the user’s democratic participation and empowerment. It also enables readers to better identify the main opportunities of participatory design, a concept which encourages the blurring of the role between user and designer. This allows people to escape their status as “end-user” and to elevate themselves to the level of creator. This book explores new avenues for rethinking the processes and practices of corporate innovation in order to cope with current socio-economic and technological changes. In so doing, it aims to help companies renew industrial models that allow them to design and produce new ranges of

technological products and services by giving the user an active role in the development process, far beyond the basic role of consumer. Intended for designers, design researchers and scientists interested in innovation and technology management, this book also provides a valuable resource for professionals involved in technology-based innovation processes. These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning - ICICKM 2014, which this year is being held at The University of Sydney Business School, The University of Sydney, Australia. The Conference Co-Chairs are Dr John Dumay from Macquarie University, Sydney, Australia and Dr Gary Oliver from the University of Sydney, Australia. The conference will be opened with a keynote by Goran Roos, Advanced Manufacturing Council, Adelaide, Australia who will address the topic of "Intellectual capital in Australia: Economic development in a high cost economy." The second day will be opened with a from James Guthrie, University of Sydney, Australia on the topic of "Intellectual Capital and the Public Sector Research: Past, Present, and Future."

Analysing political discourse in the British press during a time of crisis and austerity, this book examines how the concept of the welfare state has been constructed between 2008 and 2015. At a time when the financial crisis and government policies have put the welfare state under increased pressure, a corpus from four British newspapers from across the political spectrum - the Guardian, Daily Mirror, Daily Mail, and Daily Telegraph - is brought together to investigate the political debate on its evaluation and the ambiguity about its exact definition. Combining two theoretical approaches, Malgorzata Paprota outlines the figurative models and scenarios relevant to this element of the political system. The discourse-historical approach to discourse analysis is used to establish what the welfare state is, tracing the boundaries of the concept and which elements of political reality are explicitly associated with it. Conceptual metaphor theory is then used to explore the figurative conceptualisations of the welfare state. Together, this book shows the discursive construction, and shifting boundaries and metaphors, of the welfare state by the British press and its use in current political debates. This chapter discusses the story of European integration in what is

known as the European Union. The decision in 1951 by six European nations to pool coal and steel production under a common authority—the European Coal and Steel Community—marked the beginning of European integration. French statesman and political visionary Robert Schuman proposed the coal and steel community in 1950. The chapter also highlights that the 28-member European Union, built around common policies and shared institutions, has proved robust to many challenges and has accommodated great change used by 18 countries. The European Union was also awarded the 2012 Nobel Peace Prize. The study shows that the 2008 global financial crisis laid bare fault lines, exposing tensions between EU members and stresses and gaps in institutions and policies that Europe’s political leaders are working hard to address. The IMF’s chief for Europe argues that what Europe needs is more integration, not less. A collaborative series with the University of Cambridge Faculty of Education highlighting leading-edge research across Teacher Education, International Education Reform and Language Education. In the wake of the global financial crisis, water services have come under renewed neoliberal assault across Europe. At the same time, the struggle against water privatization has continued to pick up pace; from the re-municipalization of water in Grenoble in 2000, to the United Nations declaration of water as a human right in 2010. In *Fighting for Water*, Andreas Bieler draws on years of extensive fieldwork to dissect the underlying dynamics of the struggle for public water in Europe. From the successful referendum against water privatization in Italy, via the European Citizens’ Initiative on ‘Water and Sanitation are a Human Right’, the struggles against water privatization in Greece and water charges in Ireland, Bieler shows why water has been a fruitful arena for resistance against neoliberal restructuring. In March 2014, the Consumer Price Index (CPI) amounted to 1% (vs. 0.3% in March 2013), which represents a 0.3 p.p. rise on February 2014. As a result, the inflation rate in per annum terms, as seen by the results of the past 12 months, rose to about 6.9%. Over the period from 1 April through 21 April, the CPI climbed to 0.3%. On 3 March 2014, the Bank of Russia temporarily increased the key rate from 5.5% to 7% per annum. On 25 April 2014, Russia’s financial regulator again increased the key rate, to 7.5% per annum, thus continuing the toughening of

monetary policy. In the past decade, tensions in Asia have risen as Beijing has become more assertive in maritime disputes with its neighbors and the United States. Although taking place below the threshold of direct military confrontation, China's assertiveness frequently involves coercive elements that put at risk existing rules and norms; physical control of disputed waters and territory; and the credibility of U.S. security commitments. Regional leaders have expressed increasing alarm that such "gray zone" coercion threatens to destabilize the region by increasing the risk of conflict and undermining the rules-based order. Yet, the United States and its allies and partners have struggled to develop effective counters to China's maritime coercion. This study reviews deterrence literature and nine case studies of coercion to develop recommendations for how the United States and its allies and partners could counter gray zone activity. Proceedings of a conference session held at CifA 2014. The session focused on ways in which it is possible to engage with a wider audience in the course of maritime archaeological work. Papers offer a series of case studies exhibiting best practice with regard to individual maritime projects and examples of outreach to local communities.

In this fantasy adventure, a young girl visits a land where birds carry off men, fish eat human flesh, and she must rescue a pilfered lake. Readers who have followed Dido Twite's escapades in *Black Hearts in Battersea* and *Nightbirds on Nantucket* will welcome her return in her wildest escapade yet. Now back in print, *The Cuckoo Tree* and *The Stolen Lake* continue the *Wolves Chronicles*, the exhilarating and imaginative series that stemmed from Joan Aiken's classic *The Wolves of Willoughby Chase*. A dazzling piece of dramatic, snowballing adventure, *The Stolen Lake* is full of fantastical details: revolving palaces, witches who are also court dressmakers, an apocalyptic volcanic eruption, and an infernal country with a noticeable lack of female children. On her way back to London aboard the British man-of-war *Thrush*, twelve-year-old Dido Twite finds herself and the crew summoned to the aid of the tyrannical queen of New Cumbria. A neighboring king has stolen the queen's lake and is holding it for ransom, and it's up to Dido and the crew to face fire, flood, execution, and wild beasts to get the lake back—or else. Perfect for fans of Lemony Snicket and Roald Dahl "Aiken lures us into historical

fantasy . . . our interest never slows.” —School Library Journal “The adventure Miss Aiken has dished up . . . in *The Stolen Lake* is zanier and more devilishly fiendish than ever.” —New York Times

In 2014, Russia illegally annexed Crimea, bolstered a separatist conflict in the Donbas region, and attacked Ukraine with its regular army and special forces. In each instance of Russian aggression, the U.S. response has often been criticized as inadequate, insufficient, or hesitant. *The Moscow Factor: U.S. Policy toward Sovereign Ukraine and the Kremlin* is a unique study that examines four key Ukraine-related policy decisions across two Republican and two Democratic U.S. administrations. Eugene M. Fishel asks whether, how, and under what circumstances Washington has considered Ukraine’s status as a sovereign nation in its decision-making regarding relations with Moscow. This study situates the stance of the United States toward Ukraine in the broader context of international relations. It fills an important lacuna in existing scholarship and policy discourse by focusing on the complex trilateral—rather than simply bilateral—dynamics between the United States, Ukraine, and Russia from 1991 to 2016. This book brings together for the first time documentary evidence and declassified materials dealing with policy deliberation, retrospective articles authored by former policymakers, and formal memoirs by erstwhile senior officials. The study is also supplemented by open-ended interviews with former and returning officials. The nineteenth edition of this authoritative text continues the legacy of its earlier editions and provides a comprehensive coverage of many advanced accounting topics. Detailed fundamentals provide a natural grounding and help in gaining accounting skills and knowledge. The book is aimed at CA/CS and other professional courses such as CPT, PCC, ICWA and others. The book could be used to great advantage by students of B.Com (Hons.) and accounting professionals. The Direction of Trade Statistics Online service provides data on the value of merchandise exports and imports between each country and all its trading partners. The database includes: total bilateral and multilateral exports and imports aggregated at national or regional group level; data from 1948 at monthly, quarterly, and annual frequencies. The two volume set CCIS 775 and 776 constitutes the refereed proceedings of the First International Conference on Computational Intelligence,

Communications, and Business Analytics, CICBA 2017, held in Kolkata, India, in March 2017. The 90 revised full papers presented in the two volumes were carefully reviewed and selected from 276 submissions. The papers are organized in topical sections on data science and advanced data analytics; signal processing and communications; microelectronics, sensors, intelligent networks; computational forensics (privacy and security); computational intelligence in bio-computing; computational intelligence in mobile and quantum computing; intelligent data mining and data warehousing; computational intelligence. The UNECE Convention on the Protection and Use of Transboundary Watercourses and International Lakes provides invaluable insights into the contribution of this international agreement towards transboundary water cooperation via its legal provisions, accompanying institutional arrangements and subsidiary policy mechanisms. Judicial Watch president Tom Fitton examines what he believes are scandals and cover-ups in Barack Obama's second term. The Yearbook of Muslims in Europe is an essential resource for analysis of Europe's dynamic Muslim populations. This comprehensive annual reference work summarizes significant activities, trends and developments, and features the most current statistical information available from forty-four European countries. TERI Energy & Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by The Energy and Resources Institute (TERI) since 1986. It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors (coal and lignite, petroleum and natural gas, power, and renewable energy sources), energy demand sectors (agriculture, industry, transport, household), and local and global environment sectors (environment and climate change). The publication also provides a review of the government policies that have implications for the sectors of the Indian economy. In TEDDY, an account of India's commercial energy balances is given, which provide comprehensive information on energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable ready reckoner for researchers, scholars, and organizations working in the energy sector. After the introductory

chapters, for the ease of readers, TEDDY has been divided into sections on energy supply, energy demand, and local and global environment. Interactive graphs, figures, maps, and tables have been used throughout the chapters to explain facts, which make the book an interesting read. In addition, detailed tables at the end of each chapter represent statistical data on each of the above-mentioned sectors. The publication is accompanied by a complimentary CD containing full text. The publication has more than 15,000 readers across the globe and is often cited in international peer-reviewed journals and policy documents. This book represents a significant and timely contribution to the copious literature of the EU as a global actor providing new insights and fresh perspectives into the promotion of human rights and international labour standards in the EU's external trade relations, building on and stimulating further – the already well-engaged – scientific dialogue on this area of research. In particular, it provides the basis for developing a new analytical structure for better understanding the role of the EU in promoting human rights and international labour standards in global trade and, in particular, for assessing the extent to which and how normative considerations have influenced the adoption of EU legal instruments and policy decisions. This book will appeal to research scholars, post-graduate students, practitioners and human rights activists.

Congressman John Lewis (GA-5) is an American icon, one of the key figures of the civil rights movement. His commitment to justice and nonviolence has taken him from an Alabama sharecropper's farm to the halls of Congress, from a segregated schoolroom to the 1963 March on Washington, and from receiving beatings from state troopers to receiving the Medal of Freedom from the first African-American president. Now, to share his remarkable story with new generations, Lewis presents *March*, a graphic novel trilogy, in collaboration with co-writer Andrew Aydin and New York Times best-selling artist Nate Powell (winner of the Eisner Award and LA Times Book Prize finalist for *Swallow Me Whole*). *March* is a vivid first-hand account of John Lewis' lifelong struggle for civil and human rights, meditating in the modern age on the distance traveled since the days of Jim Crow and segregation. Rooted in Lewis' personal story, it also reflects on the highs and lows of the broader civil rights movement. Book One spans John

Lewis' youth in rural Alabama, his life-changing meeting with Martin Luther King, Jr., the birth of the Nashville Student Movement, and their battle to tear down segregation through nonviolent lunch counter sit-ins, building to a stunning climax on the steps of City Hall. Many years ago, John Lewis and other student activists drew inspiration from the 1958 comic book *Martin Luther King and the Montgomery Story*. Now, his own comics bring those days to life for a new audience, testifying to a movement whose echoes will be heard for generations.
