Thomas of Cantimpré Sep 10 2021 Medieval saints' lives have only recently begun to be studied for what they say about the society in which they were written rather than as examples of medieval religious belief. The four lives translated here are the work of a Flemish monk of the thirteenth century, Thomas of Cantimpre. These lives demonstrate the variety of definitions of holiness in the Low Countries at this time. Three of the four tell of holy women, only one of whom, Lutgard of Aywieres, was a professed nun. The lives show Thomas' respect and admiration for the women he knew and the influence that holy laywomen had. Newman (English, Northwestern University) sets the stage on which Thomas acted, explaining in clear prose, the background to the stories and giving a biography of Thomas. Both Newman and King are well known for their scholarship on medieval women and for their lucid and accurate translations. This work is highly accessible and would be excellent for classroom use, especially the section on Christina the Astonishing, which would intrigue both historians and psychiatrists. Organizational Psychology for Managers Dec 21 2019 No matter how monolithic it may appear, an organization is a collection of moving parts. Whether we are looking at building teams, providing leadership, hiring and training employees, problem solving, managing time effectively, or setting aggressive, inspiring goals, every decision can easily impact every other decision. The

complexity can quickly become overwhelming. Organizational Psychology identifies a framework and offers key methodologies managers need to define behavioral tendencies and navigate complex organizational systems. Each chapter takes a high-level view of a particular aspect of organizational psychology, focusing on elements that shape companies and drive operational efficiency. Senior-level managers and C-Suite executives will benefit from the strategies presented in this book as they clearly indicate how to understand and leverage the psychological underpinnings of any corporate environment. Balzac combines stories of jujitsu, wheat, gorillas, and the Lord of the Rings with very practical advice and hands-on exercises aimed at anyone who cares about management, leadership, and culture. Todd Raphael Editor-in-Chief ERE Media Riveting! Yes, I called a leadership book riveting. I couldn't wait to finish one chapter so I could begin reading the next. The book's combination of pop culture references, personal stories, and thought providing insights to illustrate world class leadership principles makes it a must read for business professionals at all management levels. Eric Bloom President Manager Mechanics, LLC Nationally Syndicated Columnist and Author Organizational Psychology for Managers is an insightful book that reminds the business leader of basic principles of leading a successful organization in an engaging style. As a business owner for over 25 years, I am aware of these principles; however, I need reminding of how these principles work together and impact the energy and success of my company. Throughout the book, the author demonstrates these concepts into a clear perspective by citing examples within other companies which is always a helpful technique and is often eye opening . These are situations that I may not have thought about before. This book holds the reader's interest from start to finish. I look forward to his next book! Elizabeth Brown President Softeach, Inc. "Author Stephen Balzac has written a terrific book that gets into the realpolitik of organizational psychology – the underlying patterns of behavior that create the all important

company culture. He doesn't stop at the surface level, explaining things we already know like 'culture beats strategy' - he gets into the deeper drivers and ties everything back to specific, actionable stories. For example he describes different approaches to apparent "insubordination" by a manager; rather than judging them, he shows how each management response is interpreted, and how it then drives response. Balzac preaches real engagement with one's own company and a mindful state of operation, especially by executives – who must remember that culture "just happens" unless and until they learn to recognize that their behaviors play a huge part in creating and cementing it. It covers the full spectrum of corporate life, from challenging bad decisions to hiring, training, motivating teams - and the secrets of keeping people engaged and learning – and/or avoiding actions which do the opposite. I highly recommend this book for anyone who wants to participate in creating and steering company culture." Sid Probst Chief Technology Officer Attivio – Active Intelligence I had the privilege of meeting Stephen Balzac at the 2011 International Computer Measurement Group (CMG) Conference. He was one of our keynote speakers at the Conference that year. His presentation was amazing. It was the first presentation I had seen at our Conference in which the speaker not only gave a non-technical presentation that left the audience captivated and hungry for more, but he did it without using PowerPoint, or other visuals and simply with the strength of the story and his oratory skills. As Director of CMG Publications I asked him to contribute some articles for our publications. He has been doing so now for two years and is one of our most popular authors. I was thrilled to learn Steve was having a book, *Organizational Psychology for Managers*, published, and was honored when he asked me to read it and for my opinion. *Organizational Psychology for Managers* is phenomenal. Just as his talks at conferences are captivating to his audience, Steve's book will captivate his readers. In my opinion, this book should be required reading in MBA programs, military leadership courses,

and needs to be on the bookshelf of every Fortune 1000 VP of Human Resources. Steve Balzac is the 21st century's Tom Peters. The Diaries of Paul Klee, 1898-1918 Feb 27 2023 Paul Klee was endowed with a rich and many-sided personality that was continually spilling over into forms of expression other than his painting and that made him one of the most extraordinary phenomena of modern European art. These abilities have left their record in the four intimate diaries in which he faithfully recorded the events of his inner and outer life from his nineteenth to his fortieth year. Here, together with recollections of his childhood in Bern, his relations with his family and such friends as Kandinsky, Marc, Macke, and many others, his observations on

nature and people, his trips to Italy and Tunisia, and his military service, the reader will find Klee's crucial experience with literature and music, as well as many of his essential ideas about his own artistic technique and the creative process.

1000 Great Everyday Wines Nov 12 2021 We live in a time when it is possible to enjoy excellent wine without spending a fortune. Whatever your preferred style, there is superb value to be found if you know what to look for. This new guide to the best everyday wines tells you everything you need to know for buying and enjoying wine at an affordable price, meaning you need never overspend on an average bottle again. When we say "everyday wines", we are talking about wines from the great wineries of the world that cost much less than those properties' flagship wines. Wines that a person of above average income could conceivably afford to drink two-to-three times per week. These should be wines with personality, definitely more sophisticated and authentic than, say Two-Buck Chuck or a generic Merlot from Languedoc. They should show regional characters, be labeled perhaps Haut Medoc and not Bordeaux, Monterrey County and not California, Barossa Valley rather than general Southeast Australia, etc. First and foremost, this book contains lots and lots of recommendations. A new generation of wine writers from around the world have looked in detail at the region(s) they know best and between them have picked out over a thousand superb, yet affordable, wines in every style. For most entries, a bottle or label image appears alongside the text to make it quick and easy to spot these recommended wines on a crowded liquor store or supermarket shelf. Beyond these listings of wines and producers is a wealth of information to expand your knowledge and understanding of the world of wine. A series of feature spreads looks at the most significant varietals, explaining their particular characteristics, detailing where the best Old and New World

examples come from, and suggesting foods they work well with. A further series of features focuses on the enjoyment of wine, dispensing practical advice on how to get the most from the experience: subjects include hosting a wine tasting, storing wine, and navigating the wine list in a restaurant. Compiled with as much care and attention to detail as any book on fine wine, 1,000 Great Everyday Wines is the only choice for the budding wine enthusiast who cares about getting great value for money.

The Evolved Eater Oct 19 2019 From the co-founder of Plated, the home delivery food service, an inspirational business title that is a call-to-arms and investigation into the industrial American food complex. In early 2012, Nick Taranto was twenty-seven years old, recently married, and fresh out of the Marine Corps. He moved back to New York City, started working on Wall Street, and put on twenty pounds in under six months. He was pasty, overweight, and depressed – and he knew there had to be a better way to eat (and live). *The Evolved Eater* chronicles his quest to change how we eat, and what this means for the future of food. As the co-founder of Plated, which has delivered tens of millions of meals across the country in its first five years, Taranto cares about the food we eat. As *Evolved Eaters*, we strive to continually improve and evolve as we grow through life. And eating – and being close to the food you cook and consume – is an inseparable part of this evolution. Americans throw away over 300 billion pounds of food each year, while millions of children are food insecure or poorly nourished. How did the most food abundant nation in history get this vital issue so wrong? Taranto provides eye-opening facts about how we acquire and eat food and easy and practical things that you can do to improve the way you eat (and live) starting today. Eating doesn't need to be complicated or painful or over-thought. We're starting *The Evolved Eater* revolution right here, right now.

Lafcadio Hearn: American Writings (LOA #190) Dec 01 2020 A translator of Flaubert and Gautier, Lafcadio Hearn was the master of a gaudy and sometimes self-consciously decadent literary

style, but he was also a tough-minded and keenly observant reporter, with an eye for the offbeat, the sensual, and occasionally the gruesome. The writings of his American years collected in this Library of America volume—on subjects as wide ranging as comparative folklore, the history of musical instruments, French literary avant-gardes, and New Orleans voodoo—reveal an omnivorous curiosity and an always eclectic sensibility. Some Chinese Ghosts (1887), a stylized retelling of ancient legends, foreshadows Hearn's later fascination with Asian themes. The exquisitely crafted novels Chita (1889), about the devastation wrought by a Louisiana hurricane, and Youma (1890), about a slave rebellion in Martinique, epitomize his writing at its most luxuriantly romantic, alert to the interactions of diverse cultures and suffused with imagistic splendor. His extraordinary travel book Two Years in the French West Indies (1890), presented here with the many illustrations from its first edition, provides a richly impressionistic account of his long stay on Martinique and other Caribbean islands. More than two dozen examples of Hearn's journalism from the 1870s and 1880s are also included here, evoking vanished worlds with incomparable vividness: a raucous African-American nightclub on the Cincinnati waterfront; an execution; scenes of Mardi Gras and the New Orleans French Quarter; an uncharted village of Filipino fishermen in a remote Louisiana bayou. The volume is rounded out with a revealing selection of Hearn's impassioned letters, many published here for the first time in unexpurgated form. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing, and keeping permanently in print, America's best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

Crowding in Public Transport : Who Cares and Why? Aug 21

2022

Who Cares? Feb 15 2022 Law today misnames civil liability as tort law when instead we should call it the law of care or better yet the law of love. Don't be surprised that law has always concerned itself so much with love. This book examines the earliest recovered law fragments from 4,500 years ago, reflecting even then the venerated law of care. Chapters survey civil-liability laws from Hammurabi's Code 4,000 years ago to the Covenant Code 3,500 years ago, Christ 2,000 years ago, Roman codes 1,500 years ago, old-English laws 1,000 years ago, and natural-law treatises 500 years ago, up to the Declaration of Independence and early American jurists 200 years ago. All knew and reflected care's critical value to law. Civil-liability law needs this historical and philosophical perspective, given its present political attention, special-interest lobbying, propaganda-like attacks, judicial reversals, and piecemeal and no-fault legislation. Materialism strips civil-liability law of history, dignity, and value, replacing the law of care with utilitarian doctrines calling care a burden, cost, or loss. Care is instead law's organizing concept, prime goal, and principal value. We need to know what civil liability meant from beginning of recorded time, how the wise handed it down through the ages, and what it means to us today. We need a natural history of the law of love. Who cares? We should all care. Love harms no neighbor but instead fulfills the law.

Over 1,000 Beatings, Spiritual Sanity and the Rejection of Evil

Jun 19 2022 This is a memoir and narrative of relentless terror and of combating hatred through following a path of a higher good and an inner guiding light as a child, a teenager, and an adult. From age 4 until 18 (1951-65) he is conditioned like one of Pavlov's dogs to scream and cry for his life at the hands of his biological father who is a monster. What gifts him with a spiritual sanity and a living soul to persevere is he cares for his 3 younger brothers, and he doesn't do to them or anyone else what is being done to him.

Electrical Machines and Drives Oct 31 2020 This book aims to offer a thorough study and reference textbook on electrical machines and drives. The basic idea is to start from the pure electromagnetic principles to derive the equivalent circuits and steady-state equations of the most common electrical machines (in the first parts). Although the book mainly concentrates on rotating field machines, the first two chapters are devoted to transformers and DC commutator machines. The chapter on transformers is included as an introduction to induction and synchronous machines, their electromagnetics and equivalent circuits. Chapters three and four offer an in-depth study of induction and synchronous machines, respectively. Starting from their electromagnetics, steady-state equations and equivalent circuits are derived, from which their basic properties can be deduced. The second part discusses the main power-electronic supplies for electrical drives, for example rectifiers, choppers, cycloconverters and inverters. Much attention is paid to PWM techniques for inverters and the resulting harmonic content in the output waveform. In the third part, electrical drives are discussed, combining the traditional (rotating field and DC commutator)

electrical machines treated in the first part and the power electronics of part two. Field orientation of induction and synchronous machines are discussed in detail, as well as direct torque control. In addition, also switched reluctance machines and stepping motors are discussed in the last chapters. Finally, part 4 is devoted to the dynamics of traditional electrical machines. Also for the dynamics of induction and synchronous machine drives, the electromagnetics are used as the starting point to derive the dynamic models. Throughout part 4, much attention is paid to the derivation of analytical models. But, of course, the basic dynamic properties and probable causes of instability of induction and synchronous machine drives are discussed in detail as well, with the derived models for stability in the small as starting point. In addition to the study of the stability in the small, a chapter is devoted to large-scale dynamics as well (e.g. sudden short-circuit of synchronous machines). The textbook is used as the course text for the Bachelor's and Master's programme in electrical and mechanical engineering at the Faculty of Engineering and Architecture of Ghent University. Parts 1 and 2 are taught in the basic course 'Fundamentals of Electric Drives' in the third bachelor. Part 3 is used for the course 'Controlled Electrical Drives' in the first master, while Part 4 is used in the specialised master on electrical energy.

Built for Use: Driving Profitability Through the User Experience

Dec 25 2022 The first practical guide to linking business strategy with the art and science of user experience and online design It has becoming increasingly clear that the big winners in the E-business arena are those that practice customer-centric design. While there are a multitude of good books on the art and science of user interface and website design, until *Built For Use*, there were none that focused on user experience from the corporate strategist's and marketing manager's perspectives. Drawing upon her work as a user-experience strategist for numerous Fortune 1,000 firms, Karen Donoghue explores the dynamics of business

strategy and user experience in a concise, jargon-free manner for nontechnical managers. With the help of fascinating and instructive before-and-after case studies, she helps managers become fluent in the language of user-experience; identifies user-experience and designstrategy best practices; explains how to determine what customers want; and much more.

Pandemics, Plagues, and Natural Disasters Mar 04 2021

Where is God When We Suffer? God's silence in the midst of human suffering is a great mystery of our existence. Faced with mass suffering, such as pandemics, plagues, and natural disasters, we may wonder whether God actually cares about us or whether He just says that He does. *Pandemics, Plagues, and Natural Disasters: What is God Saying to Us?* helps explain the role of God in suffering. Dr. Erwin Lutzer examines how God uses tragedies throughout the Bible to speak to His people, and that, ultimately, God always has our well-being in mind even when He doesn't relieve our immediate pain. Perhaps most importantly, find lasting joy and relief by learning how times of such widespread trouble reveal God's ultimate plans for our salvation from all temporary and eternal suffering.

Ocean Acidification. Who Really Cares? Jun 07 2021 Seminar paper from the year 2016 in the subject Biology - Ecology, language: English, abstract: Ocean acidification (OA) refers to the ongoing decrease in the pH of the earth's oceans that is caused by the uptake of Carbon dioxide (CO₂) gas from the atmosphere. It is postulated that the pH in ocean surface waters could decline further from the pre-industrial values by the end of the century (2100) if atmospheric CO₂ concentration reaches 1000 mg/l. These chemical changes in the ocean are likely to have subsequent biological consequences in marine ecosystems. Despite the wideness of the topic of ocean acidification, this brief review attempts to bring into focus, in a simplified way, some of the key aspects relating to ocean acidification. OA is introduced and viewed in terms of its impacts on selected marine organisms as well as on social systems.

Excommunication Oct 23 2022 Always connect—that is the imperative of today’s media. But what about those moments when media cease to function properly, when messages go beyond the sender and receiver to become excluded from the world of communication itself—those messages that state: “There will be no more messages”? In this book, Alexander R. Galloway, Eugene Thacker, and McKenzie Wark turn our usual understanding of media and mediation on its head by arguing that these moments reveal the ways the impossibility of communication is integral to communication itself—instances they call excommunication. In three linked essays, *Excommunication* pursues this elusive topic by looking at mediation in the face of banishment, exclusion, and heresy, and by contemplating the possibilities of communication with the great beyond. First, Galloway proposes an original theory of mediation based on classical literature and philosophy, using Hermes, Iris, and the Furies to map out three of the most prevalent modes of mediation today—mediation as exchange, as illumination, and as network. Then, Thacker goes boldly beyond Galloway’s classification scheme by examining the concept of excommunication through the secret link between the modern horror genre and medieval mysticism. Charting a trajectory of examples from H. P. Lovecraft to Meister Eckhart, Thacker explores those instances when one communicates or connects with the inaccessible, dubbing such modes of mediation “haunted” or “weird” to underscore their inaccessibility. Finally, Wark evokes the poetics of the infuriated swarm as a queer politics of heresy that deviates from both media theory and the traditional left. He posits a critical theory that celebrates heresy and that is distinct from those that now venerate Saint Paul. Reexamining commonplace definitions of media, mediation, and communication, *Excommunication* offers a glimpse into the realm of the nonhuman to find a theory of mediation adequate to our present condition.

Generational Poverty Mar 24 2020 Are the impoverished victims

of circumstance or are they contributing to their situations through their own actions and principles? This perplexing question does not have a simple answer. "Generational Poverty: An Economic Look at the Culture of the Poor" examines both sides of the coin. Written by an economist, the book provides a unique perspective into the study of this emotionally-charged issue. It shows that economic analysis can shed light on some of the roots of persistent poverty and may point to its potential solution.

Generational Poverty covers the author's eye-opening experiences with a young man named Jermaine and his family, initiated through the Big Brothers Big Sisters (BBBS) program. As someone who cares for Jermaine and his family, it was nothing short of a surprise to see first-hand some of the obstacles Jermaine's family are creating for themselves, while at the same time battling many of today's social constructs. In the course of the program, the author learned a great deal about Jermaine's life, culture, and the obstacles he faces. This work identifies impediments that Jermaine has experienced as well as common challenges faced in his community. In the words of the author: "Most of my research for this book is devoted to pinpointing these cultural issues and gathering varying opinions for each one. While I do detail each unique perspective, my goal is to align each argument to an economic fundamental. This creates a more consistent diagnosis that does not depend on a personal set of values. My hope is that future economists will continue to study this suffering portion of our population to determine the most effective way to remedy the continually increasing problem of poverty."

36 May 26 2020 "Your poem HER lured me in like a Siren. It read like swirl with light touches of alliteration, "The universe is but a jewel in her trinket box, Galaxy-studded, swirling arrays of mystical matter" I STILL have no idea what or who Her is. But I know the allegory is marvelous." "Bird of Paradise was one of my favorite poems from 36. It reminded me of a Phoenix soaring after rising from its ashes. It reminded me of all the things the caged

me in (including my self-limiting beliefs) and how felt so free walking away from it all to new beginnings." Pundamentalist Aug 09 2021 'For a collection of good old-fashioned gags, it's one of the best out there, a rich buffet of inventive wordplay that's best savoured a little at a time to fully appreciate the joy of these perfectly-constructed morsels. For original, hilarious gags you'll want to share, this is the real deal.' - Chortle 'A rollicking joyride. . .
