*Dozens of topographic, oceanic, political, economic, and physical maps of the world, in a variety of different scales, are accompanied by a 24page gazetteer From Alexandria to York, this unique illustrated guide allows us to see the great centres of classical civilization afresh. The key feature of Cities of the Classical World is 120 specially drawn maps tracing each city's thoroughfares and defences, monuments and places of worship. Every map is to the same scale, allowing readers for the first time to appreciate visually the relative sizes of Babylon and Paris, London and Constantinople. There is also a clear, incisive commentary on each city's development, strategic importance, rulers and ordinary inhabitants. This compelling and elegant atlas opens a new window on to the ancient world, and will transform the way we see it. This invaluable reference work provides an account of the development of African society from 175 million years ago, through the first appearance of humans to the complex polity of the twentieth century. Colin McEvedy tracks the development of modern man, the differentiation and spread of languages, the first crossings of the Sahara, the exploration of the Niger, and the search for the 'fountains of the Nile'. Gold and ivory lure traders from far away; Christendom and Islam compete for African attention. Names from the distant past become nation-states with aspirations appropriate to the modern world. With sixty maps and a clear, concise text, this synthesis is especially useful to African studies and history teachers, but is also a fascinating guide for the general reader. Illustrates the history of the Viking age in map form and details the Vikings' activities as traders, craftsmen, explorers, settlers, terrorists,*

*continent. Its law and institutions have shaped modern practice, and its ideal of a united Europe has haunted politicians ever since. Fully illustrated and featuring more than sixty full-colour maps, this atlas traces the rise and fall of the first great multinational state. It looks at its provinces and cities, its trade and economy, its armies and frontier defences; follows its foreign ward and internecine struggles; and charts its transformation into a Christian theocracy and its fall in 476. From its humble origins as a cluster of rival chiefdoms along the banks of the Nile, ancient Egypt rose to become one of the most advanced civilizations of its time. This atlas traces its turbulent history and remarkable cultural development, from the founding of Memphis around 5000 BC, through the territorial expansion and flourishing trade of the 'age of empire', to Greek domination and ultimate collapse. Political rivalries are charted through the successive dynasties, from the strife of the intermediate periods to the golden ages of prosperity and artistic glory under Akhenaten, Tutankhamun and Ramesses II. The latest archaeological evidence is used to cast new light on the vast architectural legacy of the world's first great nation state. The authoritative narrative, illustrated with over sixty full colour maps and over seventy plates, makes this an indispensable handbook for history students and enthusiasts alike. The cradle of Western civilisation, Ancient Greece was a land of contradictions and conflict. Intensely quarrelsome and competitive, the Greek city-states consistently proved unwilling and unable to unite. Yet, in spite of or even because of this internal discord, no ancient civilization proved so dynamic or productive. The Greeks not only colonized the Mediterranean and Black Sea areas but set standards of figurative art that endured for nearly 2500 years. Charting topics as diverse as Minoan civilization, The Persian Wars, the Athenian Golden Age and the conquests of Alexander the Great, the book traces the development of this creative and restless people and assesses their impact not only on the ancient world but also on our own attitudes and environment. The authoritative narrative, illustrated with over sixty full colour maps and over seventy plates, makes this an indispensable handbook for history students and enthusiasts alike. The Penguin Historical Atlas of Ancient Civilizations explores the world's earliest cultures, from the farming settlements of Mesopotamia to the Americas and Polynesia, via the birth of Greek city states and the foundation of Rome. It examines the development of civilizations in the Near East - Babylonian, Assyrian, Persian - as well as those in Europe - the Minoans, Etruscans and Celts. Across the continents of Africa, Asia and America, it covers such subjects as Egypt from its pre-dynastic roots to the age of the Pharaohs, China during the Shang and Zhou dynasties, and the great cities of the Incas and Aztecs. Vivid descriptions of civilizations are complemented by discussion of such key topics as colonization, agriculture and technology, and the rise of empires and city states. Richly illustrated with timelines, photographs, artwork re-creations and full-colour maps, this is an illuminating and multi-faceted one-volume introduction to early peoples and the worlds they created. - Back cover. This atlas charts the rise and fall of Hitler's Nazi state, from the first mass meeting to the NSDAP in Munich in 1920, through the relentless territorial aggression and anti-Jewish atrocities of World War II, to the execution of war criminals at Nuremberg in 1946. An informative, one-volume handbook that documents the rise and fall of one of the most terrifying and destructive regimes in world history. Over 50 full-colour world maps and graphics break down hardcore statistics to provide a compelling*

*analysis of all the political, social, economic and ecological nightmares that keep us awake at night. The world's car population has grown five times as fast as the human population over the last 50 years. Wal-Mart's sales revenue exceeds the GDP of 150 countries. Climate change may put 2.7 billion at risk of armed conflict. Germany generates more tourists than anywhere else. Americans use 160 times more water than people in Rwanda. If you want to get behind the headlines and understand the world - from urbanization to globalization, terrorism to tourism, military spending to human rights - The State of the World Atlas is unmatched. This stunning new atlas is your first-class pass on a world tour of the homes of Earth's most incredible animals. The latest exciting title in DK's popular Where on Earth? series maps out the habitats of the world's mammals, fish, birds, reptiles, invertebrates, and more. Whether it's plotting the range of a lion, following the flight paths of birds, tracking great white sharks in the oceans, or exploring the migration of the monarch butterfly, you will see exactly where and how more than 100 extraordinary animal species live. What makes Where on Earth? Animals unique are the maps themselves. Each one is individually commissioned in 3-D, with detail to show the habitat of each animal, as well as its geographic location. This reveals an astonishing amount of information about the behavior of these animals, from how seals are adapted to survive in freezing Antarctic seas to how beetles survive in the heat of the Sahara desert. There is also a focus on the conservation and protection of animals. Maps reveal the shrinking territories of some species, showing where they used to roam in the past compared to what's left of their range today. Whichever animal you're trying to track down, you're sure to find it in Where on Earth? Animals. Historisk atlas dækkende Canada, USA og Mexico The power of mapping: principles for visualizing knowledge, illustrated by many stunning large-scale, full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas, and borders that beg to be crossed. This book, from the author of Atlas of Science, describes the power of topical maps, providing readers with principles for visualizing knowledge and offering as examples forty large-scale and more than 100 small-scale full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us from a sea of data, helping us to make sense of information, connect ideas, and make better decisions in real time. In Atlas of Knowledge, leading visualization expert Katy Börner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis. Drawing on fifteen years of teaching and tool development, she introduces a theoretical framework meant to guide readers through user and task analysis; data preparation, analysis, and visualization; visualization deployment; and the interpretation of science maps. To exemplify the framework, the Atlas features striking and enlightening new maps from the popular "Places & Spaces: Mapping Science" exhibit that range from "Key Events in the Development of the Video Tape Recorder" to "Mobile Landscapes: Location Data from Cell Phones for Urban Analysis" to "Literary Empires: Mapping Temporal and Spatial Settings of Victorian Poetry" to "Seeing Standards: A Visualization of the Metadata Universe." She also discusses the possible effect of science maps on the practice of science. Traces the history of North America from the first appearance of man to 1870, with maps showing the development*

*of native civilization, the arrival of European settlers, and the formative years of the U.S. A FINANCIAL TIMES BOOK OF THE YEAR 2020 One of the least-known places on the planet, the only continent on earth with no indigenous population, Antarctica is a world apart. From a leading cartographer with the British Antarctic Survey, this new collection of maps and data reveals Antarctica as we have never seen it before. This is not just a book of traditional maps. It measures everything from the thickness of ice beneath our feet to the direction of ice flows. It maps volcanic lakes, mountain ranges the size of the Alps and gorges longer than the Grand Canyon, all hidden beneath the ice. It shows us how air bubbles trapped in ice tell us what the earth's atmosphere was like 750,000 years ago, proving the effects of greenhouse gases. Colonies of emperor penguins abound around the coastline, and the journeys of individual seals around the continent and down to the sea bed in search of food have been intricately tracked and mapped. Twenty-nine nations have research stations in Antarctica and their unique architecture is laid out here, along with the challenges of surviving in Antarctica's sunforgiving environment. Antarctica is also the frontier of our fight against climate change. If its ice melts, it will swamp almost every coastal city in the world. Antarctic Atlas illustrates the harsh beauty and magic of this mysterious continent, and shows how, far from being abstract, it has direct relevance to us all. Organized in the same innovative manner as Colin McEvedy's other Penguin historical atlases, but presented in a new, larger, and more accessible format, The Penguin Historical Atlas of the Pacific features forty-nine double-page spreads, with text facing the maps, that provide overviews of crucial moments in the history of the Pacific and the lands around it, from the formation of the ocean some twenty-eight million years ago to the end of the twentieth century. The spreads show the movements of peoples along the Pacific Rim, the occupation of oceanic islands, the development of nations, and the rise and fall of empires within and around the huge Pacific basin. The Penguin Historical Atlas of the Pacific is an essential acquisition for schools, libraries, and students of Asian and American history. This comprehensive historical atlas concentrates on the Mediterranean world but also shows what happened across the globe between A.D. 400 and 1500--from the fall of Rome to the age of discovery. Sumptuously illustrated, it features period works of art, fascinating maps, quotes from medieval figures, close-ups of intriguing artifacts, and rich landscape photographs. For every century, a signature city is spotlighted to represent that era's developments, and time lines connect the many dramatic events that took place in these dark and exciting times. Includes over 90 maps, a chronology, a glossary of terms, index, and many color illustrations. Complete Atlas of the World, 3rd Edition is now fully revised and updated to reflect the latest changes in world geography, including the annexation of Crimea and the new nation of South Sudan. Bringing each featured landscape to life with detailed terrain models and color schemes and offering maps of unsurpassed quality, this atlas features four sections: a world overview, the main atlas, fact files on all the countries of the world, and an easy-to-reference index of all 100,000 place names. All maps enjoy a full double-page spread, with continents broken down into 330 carefully selected maps, including 100 city plans. You will also find a stimulating series of global thematic maps that explore Earth's place in the universe, its physical forms and processes, the living world, and the human condition. From Antarctica to Zambia, discover the Earth continent-by-continent with*

*Complete Atlas of the World, 3rd Edition. Drawing on the latest global data and research, a collection of maps and charts provides key information on the status of women around the world. #1 NEW YORK TIMES BESTSELLER • In her latest book, Brené Brown writes, “If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection.” In Atlas of the Heart, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown’s extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. Atlas of the Heart draws on this research, as well as on Brown’s singular skills as a storyteller, to show us how accurately naming an experience doesn’t give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, “I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves.” Examines displaced cultures throughout the world, including Jewish, African, Irish, Armenian, and Palestinian diasporas. Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, Atlas Shrugged is Ayn Rand’s magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America’s best-loved novels by PBS’s The Great American Read. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand’s most extensive statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century’s leading artists. From the author of Apocalyptic Planet comes a vivid travelogue through prehistory, that traces the arrival of the first people in North America at least twenty thousand years ago and the artifacts that tell of their lives and fates. In Atlas of a Lost World, Craig Childs upends our notions of where these people came from and who they were. How they got here, persevered, and ultimately thrived is a story that resonates from the Pleistocene to our modern era. The lower sea levels of the Ice Age exposed a vast land bridge between Asia and North America, but the land bridge was not the only way across. Different people arrived from different directions, and not all at the same time. The first explorers of the New World were few, their encampments fleeting. The continent they reached had no people but was inhabited*

*by megafauna—mastodons, giant bears, mammoths, saber-toothed cats, five-hundred-pound panthers, enormous bison, and sloths that stood one story tall. The first people were hunters—Paleolithic spear points are still encrusted with the proteins of their prey—but they were wildly outnumbered and many would themselves have been prey to the much larger animals. Atlas of a Lost World chronicles the last millennia of the Ice Age, the violent oscillations and retreat of glaciers, the clues and traces that document the first encounters of early humans, and the animals whose presence governed the humans' chances for survival. A blend of science and personal narrative reveals how much has changed since the time of mammoth hunters, and how little. Across unexplored landscapes yet to be peopled, readers will see the Ice Age, and their own age, in a whole new light. In the Penguin atlas of modern history, Colin McEvedy has compiled an absorbing source of reference to the major developments of modern history from 1483 to 1815. Nearly forty maps and detailed commentary follow the voyages of Columbus, Magellan and Cook, the ebb of power from the Mediterranean to the Atlantic seaboard, and the protracted European struggle for control of a vast new money economy. The Penguin Historical Atlas of the Medieval World traces the development of peoples, cultures, and faiths between the coming of the barbarian invasions in the fourth century and the first voyages to the New World in the sixteenth. This colorful atlas illustrates the sweeping changes from the fall of the Roman Empire to the birth of Islam, the rise of Christianity, and the role of Judaism across Europe. Packed with vivid maps and photographs, this atlas is a perfect guide to Europe and its neighbors in the Middle Ages. The Penguin Atlas of Ancient History illustrates in a chronological series of maps, the evolution and flux of races in Europe, the Mediterranean area and the Near East. From 50,000 B.C. to the fourth century A.D., it is one of the most successful of the bestselling historical atlas series. A lovely small-trim edition of the award-winning Atlas of Remote Islands The Atlas of Remote Islands, Judith Schalansky's beautiful and deeply personal account of the islands that have held a place in her heart throughout her lifelong love of cartography, has captured the imaginations of readers everywhere. Using historic events and scientific reports as a springboard, she creates a story around each island: fantastical, inscrutable stories, mixtures of fact and imagination that produce worlds for the reader to explore. Gorgeously illustrated and with new, vibrant colors for the Pocket edition, the atlas shows all fifty islands on the same scale, in order of the oceans they are found. Schalansky lures us to fifty remote destinations—from Tristan da Cunha to Clipperton Atoll, from Christmas Island to Easter Island—and proves that the most adventurous journeys still take place in the mind, with one finger pointing at a map.*
