Communication Yearbook 8 Dec 05 2021 The Dynamics of Transitional Justice draws on the case of East Timor in order to reassess how transitional justice mechanisms actually play out at the local level. Transitional justice mechanisms - including trials and truth commissions - have become firmly entrenched as part of the United Nations 'tool-kit' for successful post-conflict recovery. It is now commonly assumed that by establishing individual accountability for human rights violations, and initiating truth-seeking and reconciliation programs, individuals and societies will be assisted to 'come to terms' with the violent past and states will make the 'transition' to peaceful, stable liberal democracies. Set against the backdrop of East Timor's referendum and the widespread violence of 1999, this book interrogates the gap between the official claims made for transitional justice and local expectations. Drawing on a wide range of sources, including extensive in-depth interviews with victims/survivors, community leaders and other actors, it produces a nuanced and critical account of the complex interplay between internationally-sponsored trials and truth commissions, national justice agendas and local priorities. The Dynamics of Transitional Justice fills a significant gap in the existing social science literature on transitional justice, and offers new insights for researchers and practitioners alike.

Dom's Guide To BDSM Vol. 2 Jan 18 2023 "Dom's Guide to BDSM" was specifically written for Doms/Masters. In Volume 2 of this series, we're going to focus on how to better communicate with a sub, and how to go back and forth with role playing. We're going to teach you how to express yourself, how to read your sub and look for cues, and how to go about getting a real life BDSM relationship started. We're also going to discuss how to train your sub accordingly and with a purpose. This is important and is an often-neglected part of the BDSM community. The highly sensationalized, "purely sexual" relationships you read about or see depicted in TV or movies is not the only type of relationship forged. Some relationships really are all about personal missions, self-improvement and getting in touch with suppressed inner feelings. We will cover this as well as the most important part of BDSM dominance—having a plan. You will learn how to be an excellent Dom and it all starts with a few simple steps. Note: If you have not read Volume 1 in this series (Dom's Guide To BDSM Vol. 1: 49 Must-Know Tips On How To Be The Perfect Dom/Master Your submissive Will Truly Respect & Admire), it is highly recommended that you do so before taking on this book.

Skylines and Other Dominance-Based Queries Jan 26 2021 This book is a gentle introduction to dominance-based query processing techniques and their applications. The book aims to present fundamental as well as some advanced issues in the area in a precise, but easy-to-follow, manner. Dominance is an intuitive concept that can be used in many different ways in diverse application domains. The concept of dominance is based on the values of the attributes of each object. An object dominates another object if it is better than . This goodness criterion may differ from one user to another. However, all decisions boil down to the minimization or maximization of attribute values. In this book, we will explore algorithms and applications related to dominance-based query processing. The concept of dominance has a long history in finance and multi-criteria optimization. However, the introduction of the concept to the database community in 2001 inspired many researchers to contribute to the area. Therefore, many algorithmic techniques have been proposed for the efficient processing of dominance-based queries, such as skyline queries, -dominant queries, and top- dominating queries, just to name a few.

An Approach to Jazz Piano May 30 2021 "This book is an attempt to address the techniques of piano playing as applied to the playing of jazz. It is also an attempt to address theoretical knowledge, and the application of coherent thinking when improvising jazz music. Many aspects of preparation are outlined, including scales, chords, chord symbols, chord/scale relationships, voicings, voice-leading, and the creation of melody."--Introduction.

Pastoral systems in marginal environments Oct 11 2019 Pastoral systems are some of the most fragile human ecosystems that exist and are under threat from the expansion of cultivation, changes in social patterns and climate change. These ecosystems are of major importance since they contain a rich biological and cultural diversity. The aim of the book is to take a holistic view of pastoral systems by bringing together papers written by specialists in plant and animal ecology with an interest in the application of their research with papers taking an economic and social perspective. The focus is on marginal environments where the issues are in greatest relief with the papers tackling key issues in semi-arid and disadvantaged temperate areas. The key issues relate to identifying the biological constraints of these pastoral systems, understanding soil/plant/animal relationships, exploring biodiversity, landscape and social issues in multi-functional systems and providing solutions to constraints through a number of case studies. By comparing and contrasting these two environments, the book will be taking a completely new approach to understanding how pastoral systems function and how they will evolve in the future. The book is of value to all those with an interest in pastoral systems by providing an up-to-date account of current understanding of these multi-functional systems and new insights into how they function and how they will develop in the future.

The Dominant Jul 12 2022 The second tantalizing novel in Tara Sue Me's New York Times bestselling Submissive series... Nathaniel West doesn't lose control. As the playboy CEO of West Industries, he governs the boardroom during the day; as a strict dominant with exacting rules, he commands the bedroom at night. He never takes on inexperienced submissives, but when Abigail King's application comes across his desk, he breaks his own

restrictions and decides to test her limits. Abby's combination of innocence and willingness is intoxicating, and Nathaniel is soon determined to collar her as his own. As long as she follows his orders and surrenders herself fully to him, no one will get hurt. But when Nathaniel begins falling for Abby on a deeper level, he realizes that the trust must go both ways—and he has secrets which could bring the foundations of their entire relationship crashing down...

Principles and Practice of Constraint Programming Dec 13 2019 This book constitutes the refereed conference proceedings of the 23rd International Conference on Principles and Practice of Constraint Programming, CP 2017, held in Melbourne, Australia from August 28, 2017 until September 1, 2017. The conference is colocated with the 20th International Conference on Theory and Applications of Satisfiability Testing (SAT 2017) and the 33rd International Conference on Logic Programming. The 46 revised full papers presented were carefully reviewed and selected from 115 submissions. The scope of the contributions includes all aspects of computing with constraints, including theory, algorithms, environments, languages, models, systems, and applications such as decision making, resource allocation, scheduling, configuration, and planning. The papers are grouped into the following tracks: technical track; application track; machine learning & CP track; operations research & CP track; satisfiability & CP track, test and verification & CP track; journal & sister conference track.

Geometry of the Quintic Sep 02 2021 This book helps students at the advanced undergraduate and beginning graduate levels to develop connections between the algebra, geometry, and analysis that they know, and to better appreciate the totality of what they have learned. The text demonstrates the use of general concepts by applying theorems from various areas in the context of one problem - solving the quintic. The problem is approached from two directions: the first is Felix Klein's nineteenth-century approach, using the icosahedron. The second approach presents recent works of Peter Doyle and Curt McMullen, which update Klein's use of transcendental functions to a solution through pure iteration.

Perception, Representations, Image, Sound, Music Jun 18 2020 This book constitutes the refereed proceedings of the 14th International Symposium on Perception, Representations, Image, Sound, Music, CMMR 2019, held in Marseille, France, in October 2019. The 46 full papers presented were selected from 105 submissions. The papers are grouped in 9 sections. The first three sections are related to music information retrieval, computational musicology and composition tools, followed by a section on notations and instruments distributed on mobile devices. The fifth section concerns auditory perception and cognition, while the three following sections are related to sound design and sonic and musical interactions. The last section contains contributions that relate to Jean-Claude Risset's research.

One Dom to Love Aug 13 2022 Raine Kendall has been in love with her boss, Macen Hammerman, for years. Determined to make the man notice that she's a grown woman with desires and needs, she pours out her heart and offers her body to him-only to be crushingly rejected. But when his friend, very single, very sexy Liam O'Neill watches the other Dom refuse to act on his obvious feelings for Raine, he resolves to step in and do whatever it takes to help Hammer find happiness again, even rousing his friend's possessive instincts by making the girl a proposition too tempting to refuse. But he never imagines that he'll end up falling for her himself. Hammer has buried his lust for Raine for years. After rescuing the budding runaway from an alley behind his exclusive BDSM Dungeon, he has come to covet the pretty submissive. But tragedy has taught him that he can never be what she needs. So he watches over her while struggling to keep his distance. Liam's crafty plan blindsides Hammer, especially when he sees how determined his friend is to possess Raine for his own. Hammer isn't ready to give the lovely submissive over to any other Dom, but can he heal from his past and fight for her? Or will he lose Raine if she truly gives herself-heart, body, and soul-to Liam?

Guide to BDSM Sep 14 2022 You or your partner are fascinated by BDSM, but don't know how and where to start? Everything you need to know, you will find it in this book. Most of what people think about BDSM, is wrong. In reality BDSM is not degrading women or men and you will also understand that it's not as obscure as you think. And also the concept of "pain" we are talking about is not what people think. You will also understand that having the role of the Dom is not just about having pleasure, on the contrary, the Dom has the role of giving pleasure and discipline to the submissive. He must have pleasure in giving pleasure and not simply receiving what he wants. This book is intended for both Dominant and Submissive training. It's also perfect for those who haven't experience in this world. This is a taste of what you will find in this book: What is BDSM and Why? Logic, Rationality, and Interaction Jun 30 2021 Edited in collaboration with FoLLI, the Association of Logic, Language and Information, this book constitutes the refereed proceedings of the Third International Workshop on Logic, Rationality, and Interaction, LORI 2011, held in Guangzhou, China, in October 2011. The 25 revised full papers presented together with 12 posters were carefully reviewed and selected from 52 submissions. Among the topics covered are semantic models for knowledge, for belief, and for uncertainty; dynamic logics of knowledge, information flow, and action; logical analysis of the structure of games; belief revision, belief merging; logics and preferences, compact preference representation; logics of intentions, plans, and goals; logics of probability and uncertainty; logical approaches to decision making and planning; argument systems and their role in interaction; norms, normative interaction, and normative multiagent systems; and logical and computational approaches to social choice.

Her Blue Collar Dom Nov 16 2022 She wants a revenge affair to get over a failed relationship. He meets a pretty girl in a casino one night and thinks a fling with her would be fun. Ben is a secret Dom and he opens up a whole new world for Sabrina. As the two become closer, she fears she is falling for him. Sabrina is keeping a secret, though - a lie by omission. It's been all fun and games so far, but what will happen when Ben finds out? Will the betrayal end what was beginning to be a perfect union for both of them, or will it somehow cement their bond even more?

Great Ape Societies Mar 08 2022 The great apes (chimpanzees, bonobos, gorillas and orangutans) are our closest living relatives, sharing a common ancestor only five million years ago. We also share key features such as high intelligence, omnivorous diets, prolonged child-rearing and rich social lives. The great apes show a surprising diversity of adaptations, particularly in social life, ranging from the solitary life of orangutans, through patriarchy in gorillas to complex but different social organisations in bonobos and chimpanzees. As great apes are so close to humans, comparisons yield essential knowledge for modelling human evolutionary origins. Great Ape Societies provides comprehensive up-to-date syntheses of work on all four species, drawing on decades of international field work, zoo and laboratory studies. It will be essential reading for students and researchers in primatology, anthropology, psychology and human evolution.

Understanding Genetics Jan 06 2022 The purpose of this manual is to provide an educational genetics resource for individuals, families, and health professionals in the New York - Mid-Atlantic region and increase awareness of specialty care in genetics. The manual begins with a basic introduction to genetics concepts, followed by a description of the different types and applications of genetic tests. It also provides information about diagnosis of

genetic disease, family history, newborn screening, and genetic counseling. Resources are included to assist in patient care, patient and professional education, and identification of specialty genetics services within the New York - Mid-Atlantic region. At the end of each section, a list of references is provided for additional information. Appendices can be copied for reference and offered to patients. These take-home resources are critical to helping both providers and patients understand some of the basic concepts and applications of genetics and genomics.

Dom's Guide To Submissive Training Vol. 2 May 10 2022 There are two foundational pillars of a BDSM relationship between a Dom and a sub: consent and trust. Everything else in the relationship - the fun, the love, the discipline, the eroticism, the tears and the journey - are all built on those standards. Both consent and trust require honest communication in order to thrive. The vast majority of that communication begins long before the training begins. In "Dom's Guide to Submissive Training Vol. 2," I listed 25 things you must know about your new sub if you want to create a satisfying relationship with a devoted submissive. It's not enough to just ask "What do you like?" or "Would you like to be my sub?" You need to know things about your sub that are deeper, more practical and helpful. Without the knowledge of these 25 things, you may be able to create momentarily excitement but it will surly turn into a frustrating short-term relationship headed for drama, disaster and end. Following this guide allows your sub to communicate freely and provides a mechanism for her to reveal her true self - even if she doesn't have the words to do so. There are a million things subs want their Doms to know. These questions will help your sub tell you.

Computing and Combinatorics Nov 23 2020 This book constitutes the refereed proceedings of the 19th International Conference on Computing and Combinatorics, COCOON 2013, held in Hangzhou, China, in June 2013. The 56 revised full papers presented were carefully reviewed and selected from 120 submissions. There was a co-organized workshop on discrete algorithms of which 8 short papers were accepted and a workshop on computational social networks where 12 papers out of 25 submissions were accepted.

Assessing Dynamics of Democratisation Mar 28 2021 The book summarises the critique of these approaches, suggests a comprehensive alternative framework, and shows how the alternative works in reality through a case study of the largest of the new democracies, Indonesia.

Algebraic Monoids, Group Embeddings, and Algebraic Combinatorics Feb 13 2020 This book contains a collection of fifteen articles and is dedicated to the sixtieth birthdays of Lex Renner and Mohan Putcha, the pioneers of the field of algebraic monoids. Topics presented include: structure and representation theory of reductive algebraic monoids monoid schemes and applications of monoids monoids related to Lie theory equivariant embeddings of algebraic groups constructions and properties of monoids from algebraic combinatorics endomorphism monoids induced from vector bundles Hodge-Newton decompositions of reductive monoids A portion of these articles are designed to serve as a self-contained introduction to these topics, while the remaining contributions are research articles containing previously unpublished results, which are sure to become very influential for future work. Among these, for example, the important recent work of Michel Brion and Lex Renner showing that the algebraic semi groups are strongly π -regular. Graduate students as well as researchers working in the fields of algebraic (semi)group theory, algebraic combinatorics and the theory of algebraic group embeddings will benefit from this unique and broad compilation of some fundamental results in (semi)group theory, algebraic group embeddings and algebraic combinatorics merged under the umbrella of algebraic monoids.

Mastering the Art of Dominance Feb 07 2022 Are you a frustrated Dom? Have you tried to be the best Dom possible but can't seem to find any subs? Do your sessions end prematurely? Are you not quite sure what you're doing wrong or how to start setting up programs for a sub that wants emotional healing? You've come to the right place! Continuing our line of BDSM education books, we've compiled a list of tips that we call "Troubleshooting Tips", especially made for Doms who are stuck in a circle of inactivity. Your subs may complain that you're too aggressive or too nice, or maybe that you just don't understand. The problem is not necessarily with you or your attitude. Usually it's because you haven't been formally trained on how to DIRECT a sub towards a progressive plan of action. It is your job to train a sub, explain the punishments and rewards, and transform her thinking. No Dom has ever started off a complete natural. Everyone needs training and additional tips for turning their intermediate knowledge into professional / expert level understanding. In "Mastering The Art of Dominance," you will learn: - How to attract subs (even if you've been unsuccessful in the past) - How to avoid mentally disturbed subs before it's too late - How to turn your friend-with-benefits into a sub - How to identify troubled subs who can be helped and how to help them - How to manage multiple subs and multiple partners with fellow Doms - How to deal with jealousy and rivalries with multiple subs - And much more... By the time you finish this book, you're going to be ready to be a top of your class Dom!

Her Convenient Dom Oct 03 2021 Parker Bentley, widower and owner of a popular restaurant chain, has just asked his nanny to marry him. And he's made it very clear that even though it is a marriage of convenience to save his company from a takeover, it will be a real marriage. There will be no divorce, ever. He will be the head of the household, and she will have rules to follow. She will want for nothing, with a beautiful home in Chicago, a beach house in South Carolina, and money to buy whatever she wants. In return, she will help him run his business and his household, and raise his two small children. She will be his wife, in every sense of the word. His convenient wife. Harper Easton can't believe her luck. The handsome, sweet man she works for has just asked her to marry him. However, there are strings attached. He expects her loyalty, her obedience, and her trust. Someone is trying to steal his affections and his company, and he is not having any of it. Harper is the key to preventing that from happening. She knows he doesn't love her, even though she is beginning to have feelings for him. Can she go through with it? How hard can it be? After all, he is a wonderful father, a fair employer, and fun to be around. Surely, she could be his wife, his lover, his partner and mother to his children without love getting in the way. And as far as his domineering ways are concerned, she finds those very sexy indeed... Publisher's Note: While this is book 2 of the Dominant Men series, it can be read and enjoyed as a standalone.

Outskirts of Galaxy Clusters (IAU C195) Nov 04 2021 This book contains the proceedings of the International Astronomical Union Colloquium no. 195, held in Torino, Italy in 2004. The meeting investigated the formation of galaxies within a full cosmological context, focusing on the outer regions of galaxy clusters. The observed correlation of optical and radio properties of galaxies with their environment indicates that the formation and evolution of galaxies is intimately linked to the formation of large scale structure. With chapters written by leading authorities in the field, this timely volume investigates the role of the environment in determining the properties of galaxies. It describes the distribution of matter and galaxies on the largest scales in the Universe, the processes of cluster and galaxy formation, their role and interplay. This is a valuable collection of review articles for professional astronomers.

Kilted Cowboy Dom (Club Esoteria Texas 2) Oct 23 2020 [Siren Classic: BDSM, Contemporary, MF, HFN] Celebrating her discharge from the Army, Ella Fairchild allows her friends to dress her up as a cartoon character and drag her to Club Esoteria Texas. An avid BDSM reader, she's never been to a club, and never expected to find herself in trouble for knocking a Dom on his ass. Duncan Stewart, head of club security, is intrigued by the bevy of princesses the boss's wife invited to the club. Especially the dark princess who he must punish for retaliating after one of the dominants slaps her. Unemployed and worried about the future, Ella accepts a job as a mechanic on Gunnar McNeil's ranch. Her vow to not get involved with coworkers is

sorely tested when finds out Duncan is the ranch foreman. Will Ella fit in on the ranch? Will Duncan be able to convince her to change her no dating coworkers policy? Will Winslow the goat end up as dinner while Jillian is away?

[Seize Me from Darkness](#) Aug 21 2020 In this dirty, bloody world we live in, the answers to prayers aren't always pretty angels. Retaken by human traffickers, Jazmine's one hope is ex-cop, ex-mercenary, Pieter, a man with a glower that stops lesser men in their tracks. She prays he can save her. But this savior is far from perfect, and his flaws may prove as devastating to Jazmine as the torture of her captors. The fire of dominance never dies.

Submissive's Guide To BDSM Vol. 2 Jun 11 2022 Being a sub means this BDSM game is really all about your pleasure. The Dom's goal is to provide you with the pleasure you crave and send you to a higher level of eroticism through very intensive sessions of bondage, discipline, sadism and masochism. During volume 1 we talked about trust; finding a Dom you can trust and one that meets your high standards. In this book, we are going to explain how you as a sub can develop a criteria for your Dom and ensure that each session is going to be enjoyable. Here are just some of the things you will discover in volume 2 of "Submissive's Guide To BDSM": - What is your "Ideal Scene"... - How and what you should tell your Dom, when he creates the scene... - How to create a mutually beneficial relationship with your Dom... - Etiquette on being a sub for the first time... - How to enjoy the pain as a sub... - How to work with multiple Doms... - How to reach a whole zenith of pleasure... - How to make your vanilla spouse enjoy BDSM with you... - And much more...

Environmental Chemistry and Toxicology of Mercury Apr 28 2021 The book that looks at mercury's impact on the planet today Recent research by the EPA has concluded that one in six women of childbearing age have unsafe levels of mercury in their bodies, which puts 630,000 newborn babies each year at risk of neurological impairment. Mercury poses severe risks to the health of animals and ecosystems around the world, and this book provides the essential information that anyone interested in environmental sciences should know about the fundamentals of the entire mercury cycle. Comprised of four parts that present an overview of mercury in the environment, mercury transformations, transport, and bioaccumulation and toxicology, each chapter of *Environmental Chemistry and Toxicology of Mercury* includes the basic concepts of the targeted subject, a critical review of that subject, and the future research needs. This book explains the environmental behavior and toxicological effects of mercury on humans and other organisms, and provides a baseline for what is known and what uncertainties remain in respect to mercury cycling. The chapters focus on the fundamental science underlying the environmental chemistry and fate of mercury. This work will be invaluable to a wide range of policy experts, environmental scientists, and other people requiring a comprehensive source for the state of the science in this field.

[Numerical Methods of Exploration Seismology](#) Apr 16 2020 Exploration seismology uses seismic imaging to form detailed images of the Earth's interior, enabling the location of likely petroleum targets. Due to the size of seismic datasets, sophisticated numerical algorithms are required. This book provides a technical guide to the essential algorithms and computational aspects of data processing, covering the theory and methods of seismic imaging. The first part introduces an extensive online library of MATLAB® seismic data processing codes maintained by the CREWES project at the University of Calgary. Later chapters then focus on digital signal theory and relevant aspects of wave propagation and seismic modelling, followed by deconvolution and seismic migration methods. Presenting a rigorous explanation of how to construct seismic images, it provides readers with practical tools and codes to pursue research projects and analyses. It is ideal for advanced students and researchers in applied geophysics, and for practicing exploration geoscientists in the oil and gas industry.
